## Manual 2005 Fleetwood Orbit:

*When the Medium Was the Mission* Jenna Supp-Montgomerie, 2021-02-16 FINALIST 2022 PROSE Award in Theology Religious Studies An innovative exploration of religion's influence on communication networks When Samuel Morse sent the words what hath God wrought from the US Supreme Court to Baltimore in mere minutes it was the first public demonstration of words travelling faster than human beings and farther than a line of sight in the US This strange confluence of media religion technology and US nationhood lies at the foundation of global networks The advent of a telegraph cable crossing the Atlantic Ocean was viewed much the way the internet is today to herald a coming world wide unification President Buchanan declared that the Atlantic Telegraph would be an instrument destined by divine providence to diffuse religion civilization liberty and law throughout the world through which the nations of Christendom would spontaneously unite Evangelical Protestantism embraced the new technology as indicating God's support for their work to Christianize the globe Public figures in the US imagined this new communication technology in primarily religious terms as offering the means to unite the world and inspire peaceful relations among nations Religious utopianists saw the telegraph as the dawn of a perfect future Religious framing thus dominated the interpretation of the technology's possibilities forging an imaginary of networks as connective so much so that connection is now fundamental to the idea of networks In reality however networks are marked at core by disconnection With lively historical sources and an accessible engagement with critical theory *When the Medium was the Mission* tells the story of how connection was made into the fundamental promise of networks illuminating the power of public Protestantism in the first network imaginaries which continue to resonate today in false expectations of connection
