The Business Environment Paul Wetherly, Dorron Otter, 2014 Designed specifically for students new to the study of business this book explores the global range of environments within which business operates Wetherly and Otter encourage critical thinking via a unique themes and issues approach which reflects the integrated dynamic reality of businesses today

Political, Economic and Financial Country Risk Mohamed A. Ramady, 2013-10-19 Decades go by and nothing happens then weeks go by and decades happen This apt saying encapsulates the dramatic convulsions taking place across the Arab world that first erupted in 2011 in Tunisia and which rapidly spread to other countries These events have affected the lives of ordinary citizens in many more ways than had been intended when the Arab Spring broke out with the endgame still not very clear as demonstrated in countries like Egypt Syria and Libya By comparison with some exceptions the six countries comprising the Gulf Cooperation Council have been relatively unaffected by the general turbulence and uncertainties lapping around them However geopolitical shifts involving global superpower rivalries combined with revolutionary breakthroughs in the non conventional hydrocarbon energy sector are threatening to challenge the importance of the Arabian Gulf as the world's leading suppliers of energy putting their economies under fiscal stress The author examines such challenges by Providing the first in depth statistical analytical assessment of the GCC countries using monthly data over the period 2001-2013 for the three risk categories economic financial and political risks and their sub components so as to enable policymakers enhance components with low risk while addressing components with perceived higher risk Assessing FDI and capital inflows and outflows before and after the Arab Spring and how to encourage FDI inflows Inter Arab and GCC trade and synergies in power transmission transportation links and establishing new hubs of centers of manufacturing excellence Exploring private sector led growth models to reduce forecasted unemployment Being complacent is not an option for the GCC The aim of the book is that having a better understanding of each of the GCC countries individual risk parameters will enable the GCC meet future challenges and reduce the chances of a negative Arab Spring occurring in the region Mohamed Ramady is a Visiting Associate Professor at the Department of Finance and Economics King Fahd University of Petroleum and Minerals His main research interests are the economics of the Middle East and Saudi Arabia in particular as well as money and banking He also held senior positions with international financial institutions in the Arabian Gulf and Europe

The Political Economy of City Branding Ari-Veikko Anttiroiko, 2014-02-24 Globalization affects urban communities in many ways One of its manifestations is increased intercity competition which compels cities to increase their attractiveness in terms of capital entrepreneurship information expertise and consumption This competition takes place in an asymmetric field with cities trying to find the best possible ways of using their natural and created assets the latter including a naturally evolving reputation or consciously developed competitive identity or brand The Political Economy of City Branding discusses this phenomenon from the perspective of numerous post industrial cities in North

America Europe East Asia and Australasia Special attention is given to local economic development policy and industrial profiling and global city rankings are used to provide empirical evidence for cities characteristics and positions in the global urban hierarchy On top of this social and urban challenges such as creative class struggle are also discussed The core message of the book is that cities should apply the tools of city branding in their industrial promotion and specialization but at the same time take into account the special nature of their urban communities and be open and inclusive in their brand policies in order to ensure optimal results This book will be of interest to scholars and practitioners working in the areas of local economic development urban planning public management and branding

Adopting a Harmonized Regional Approach to Customs Regulation for the Tripartite Free Trade Agreement Vimbai Lisa Michelle Jana, 2017-09-19

The three regional economic communities RECs in Eastern and Southern Africa are the Common Market for Eastern and Southern Africa COMESA the East African Community EAC and the Southern African Development Community SADC Together they have recognised the need to work towards regional cooperation aimed at the eventual creation of a single regional economic community or Tripartite Free Trade Agreement TFTA This will replace the existent RECs in Eastern and Southern Africa to which the member states of these two regions have multiple membership The TFTA region comprises a total of 27 member states which have a combined population of 527 million people and a combined gross domestic product GDP of USD 624 billion These statistics translate into a potential regional economic powerhouse for Eastern and Southern Africa One of the major goals of the TFTA is to harmonise trade arrangements among the three RECs improve the movement of goods and persons within the single integrated region facilitate the joint implementation of regional infrastructure projects and enhance co operation of member states This is a laudable initiative by the member states of the three RECs and it is recognised that regional integration is the first step towards integration into a multilateral trading system For the TFTA member states it is crucial that there is an awareness to move towards a review of domestic customs legislation and policy and to develop regional supranational legislation and regulations in order to gain a stronger competitive edge in the global market This study shies away from proposing a quick fix or instant benefit to the harmonisation of TFTA member states customs legislative frameworks and policies and the development of a single automated interoperable electronic customs system Rather it places its focus on long term sustainable benefits which will be realised over time The harmonisation of TFTA member state customs legislative policies and the resultant Information and Communications Technology ICT reforms to the customs processes of the TFTA member states though not immediate or short term will strategically position the region to conduct business in an increasingly volume driven fast paced electronic global economy

The Great Surge Steven Radelet, 2016-11-22 The Great Surge tells the remarkable story of this unprecedented economic social and political transformation It shows how the end of the Cold War the development of new technologies globalization courageous local leadership and in some cases good fortune have combined to dramatically improve the fate of hundreds of millions of people

in poor countries around the world Most importantly The Great Surge reveals how we can fight the changing tides of climate change resource demand economic and political mismanagement and demographic pressures to accelerate the political economic and social development that has been helping the poorest of the poor around the world Amazon com The Risk Pivot Bruce D. Jones, David Steven, 2014-11-21 The last decade has seen a revolution in global energy First we saw explosive growth in demand from Asia's rising powers which fueled fears about scarcity and conflict But we've also seen an American revolution in technology and markets resulting in a dramatic increase in supply This is strengthening America's hand in the world but it's not without complications There are major security consequences of these shifts Among the most consequential are China and India Asia's emerging giants which are increasingly exposed to political risks associated with energy risks as well as the energy flows pivoting to Asia Meanwhile the great powers struggle to balance their need for fossil fuels with a mounting effort to tackle climate change The top powers and the United States above all face a strategic choice whether to use energy as a weapon of geopolitics or as a tool of a stable order
