5 Temperature Range

Based on the selected temperature range, the target of interest will be highlighted on the image.

7 About Image Calibration

- Image calibration helps to optimize image quality and temperature measurement accuracy. During the calibration, the image will pause briefly and you'll hear a "click" as a shutter moves in front of the detector.
- You can turn off the automatic calibration for smooth display. But keeping it off for a long time will cause image abnormal and temperature measurement inaccurate. In this case, you can use manual calibration instead.
