Motivation Theory Research And Applications 6th Edition:

Cognitive Motivation David Beswick, 2017-08-10 Motivation and cognition were treated as separate concepts throughout most of twentieth century psychology. However, in recent years, researchers have begun viewing the two as inextricably intertwined: not only does what we want affect how we think, but how we think affects what we want. In this innovative study, Beswick presents a new general theory of cognitive motivation synthesizing decades of existing research in social cognitive and personality psychology. New basic concepts are applied to a wide range of purposive behaviour. Part I of the volume reviews different forms of cognitive motivation such as curiosity, cognitive dissonance, achievement motivation, and the search for purpose and meaning, while Part II examines the basic processes that underlie it, such as working memory, attention, and emotion. The central concept is the incomplete gestalt in which motivation is generated by a universal striving to integrate information and make sense at all levels of cognitive organization. **Instructional Supervision** Sally J.

Reason-Emotion Split Daniel S. Levine, 2020-12-29 Healing the Reason-Emotion Split draws on research from experimental psychology and neuroscience to dispel the myth that reason should be heralded above emotion. Arguing that reason and emotion mutually benefit our decision-making abilities, the book explores the idea that understanding this relationship could have long-term advantages for our management of society's biggest problems. Levine reviews how reason and emotion operated in historical movements such as the Enlightenment, Romanticism, and 1960s counterculture to conclude that a successful society would restore human connection and foster compassion in economics and politics by equally utilizing reason and emotion. Integrating discussion on classic and contemporary neurological studies and using allegory, the book lays out the potential for societal change through compassion and would be of interest to psychologists concerned with social
