SMOKE ALARM FEATURES

- This smoke alarm is powered by 120V AC and a 9-volt battery back-up source. AC/DC smoke alarms offer added protection in the event of a power failure or a drained battery.
- Unique power connector prevents interconnection with incompatible smoke alarms or security systems.
- This smoke alarm may be interconnected with as many as 11 other Firex model AD, ADC, PAD or FX1218 smoke alarms, and as many as 6 Firex model ADH1 heat alarms for a total of not more than 18 interconnected devices.
- Optional tamper-resist feature can serve as a safeguard against tampering.
- Models AD and ADC have a unique "battery missing" lockout. The smoke alarm will not attach to the mounting bracket if a battery is not in the battery pocket.
- Improperly connected or weak battery signal. The smoke alarm will sound a short beep about once a minute if the battery is weak or improperly connected.
- Green and red LED indicator(s) show when the smoke alarm is receiving AC power, working under normal operation, in alarm, or under false alarm control.
- Loud alarm horn—85 decibels at 10 feet—sounds to alert you of an emergency.
- This alarm incorporates the internationally recognized horn signal for evacuation. During alarm mode, the horn produces three short beeps followed by a 2 second pause and then repeats. This pattern is somewhat different than the previous alarm sound, which continually beeped.
- Test button checks smoke alarm operation. Models ADC and FADC also feature a False Alarm Control™ which, when activated, quiets unwanted alarms for up to 15 minutes.
- Model FADC features a latching LED which keeps the initiating alarm Red LED illuminated until manually reset.
