Simple Genius: King and Maxwell Book 3 David Baldacci,2020-04-14

Becoming Bestsellers: John Grisham and Danielle Steel (Sample from Chapter 2 of THE BESTSELLER CODE) Jodie Archer,Matthew L. Jockers,2016-08-16 This sneak peek teaser featuring literary giants John Grisham and Danielle Steele from Chapter 2 of The Bestseller Code a groundbreaking book about what a computer algorithm can teach us about blockbuster books stories and reading reveals the importance of topic and theme in bestselling fiction according to percentages assigned by what the authors refer to as the bestseller ometer Although 55 000 novels are published every year only about 200 hit the lists a commercial success rate of less than half a percent When the computer

was asked to blindly select the most likely bestsellers out of 5 000 books published over the past thirty years based only on theme it discovered two possible candidates The Accident by Danielle Steel and The Associate by John Grisham The computer recognized quantifiable patterns in their seemingly opposite but undeniably successful writing careers with legal thrillers and romance In Chapter 2 Archer and Jockers analyze this data and divulge the most and least likely to best sell topics and themes in fiction with a human discussion of the why behind these results The Bestseller Code is a big idea book about the relationship between creativity and technology At heart it is a celebration of books for readers and writers a compelling investigation into how successful writing works

The Bestseller Code Jodie Archer, Matthew L. Jockers, 2016-09-20 When a story captures the imagination of millions that's magic Can you qualify magic Archer and Jockers just may have done so Sylvia Day New York Times bestselling author Ask most people about massive success in the world of fiction and you'll typically hear that it's a game of hazy crystal balls The sales figures of E L James or Dan Brown seem to be freakish random occurrences in an unknowable market But what if there were an algorithm that could reveal a secret DNA of bestsellers regardless of their genre What if it knew just from analyzing the words alone not just why genre writers like John Grisham and Danielle Steel belong on the lists but also that authors such as Junot Diaz Jodi Picoult and Donna Tartt had telltale signs of success all over their pages Thanks to Jodie Archer and Matthew Jockers the algorithm exists the code has been cracked and the results bring fresh new insights into how fiction works and why we read The Bestseller Code offers a new theory for why Fifty Shades of Grey sold so well It sheds light on the current craze for dark heroines It reveals which themes tend to sell best And all with fascinating supporting data taken from a five year study of twenty thousand novels Then there is the hunt for the one the paradigmatic example of bestselling writing according to a computer's analysis of thousands of points of data The result is surprising a bit ironic and delightfully unorthodox This book explains groundbreaking text mining research in accessible terms and offers a new perspective on the New York Times bestseller list It's a big idea book about the relationship between creativity and technology that will be provocative to anyone interested in how analytics have already transformed the worlds of finance medicine and sports But at heart it is a celebration of books for readers and writers a compelling investigation into how successful writing works and a fresh take on our intellectual and emotional response to stories

Hour Game - King and Maxwell David Baldacci, 2019-11-12 Following their collaboration in Split Second ex Secret Service agents Sean King and Michelle Maxwell have gone into partnership and are investigating the robbery of some secret documents at the residence of the incredibly wealthy Battle family It seems like a straightforward case of domestic burglary but soon they begin to suspect links to larger more terrifying events now shaking the prosperous town of Wrightsburg The unidentified corpse of an attractive young woman turns up in the woods two high school kids one shot in the back the other in the face are found dead in their car a successful lawyer is discovered stabbed to death in her own home A serial killer is on the loose The murderer kills in the manner of famous killers of the past but takes care to leave

a stopped watch at the scene of each crime corresponding to the victim's position on his hit list. As the killing spree escalates, it seems that the fractured Battle family are somehow involved, and Maxwell and King suddenly find themselves racing to solve an intricate puzzle: one that is full of tantalizing clues but barren of solid evidence, and one that is leaving even the FBI confounded. And all the while, the body count is rising.
