Rose,1987 **The Gift of Ford** Ivor Tossell,2012-10-16 Following widespread news that Toronto Police are in possession of the alleged Rob Ford crack cocaine video there has never been a better time to read the essential backgrounder to Rob Ford s increasingly wild and erratic mayoralty When people talk about recalling politicians it s usually because the politician delivered something other than what they advertised and the voters voted for lies frauds and infidelities Toronto Mayor Rob Ford however is exactly what the voters endorsed They elected him with full knowledge of his obstreperous history as a city councillor his inability to play well with others his one track mind and one track message His opponents warned voters that his platform was mostly wishful thinking But Torontonians voted for him anyway The story of Rob Ford is the story of what happens when voters the supreme authority throw a wrench into the gears of democracy and elect someone who can t govern and manifestly never could Ford s mayoralty has forced Toronto to reconsider questions that seemed settled long long ago What kind of city chose this man to take the helm Where does a mayor derive his mandate from the voters the polls or talk radio Does it matter if a man is a national embarrassment if he s popular at home Unwittingly Ford has made possible a resurgence of the urban values that unite conservatives and liberals alike galvanizing citizens in a way the city hasn t seen in some time This is The Gift of Ford The Road Way ,1975

Harker,2012-12-06 3 While all of these explanations seem to have merit there is one dominant reason why the percentage of GDP and employment dedicated to services has continued to increase low productivity According to Baumol s cost disease hypothesis Baumol Blackman and Wolff 1991 the growth in services is actually an illusion The fact is that service sector productivity is improving slower than that of manufacturing and thus it seems as if we are consuming more services in nominal terms However in real terms we are consuming slightly less services That is the increase in the service sector is caused by low productivity relative to manufacturing The implication of Baumol s cost disease is the following Assuming historical productivity increases for manufacturing agriCulture education and health care Baumol 1992 shows that the U S can triple its output in all sectors within 50 years However due to the higher productivity level for manufacturing and agriculture it will take substantially more employment in services to achieve this increase in output To put this argument in perspective simply roll back the clock 100 years or so and replace the words manufacturing with agriculture and services with manufacturing The phenomenal growth in agricultural productivity versus manufacturing caused the employment levels in agriculture in the U S to decrease rapidly while producing a truly unbelievable amount of food It is the low productivity of services that is the real culprit in its growth of GDP and employment share **Consumer Survival** Wendy Reiboldt,Melanie Horn Mallers,2013-11-26 Designed to empower readers to advocate for themselves and others this wide ranging encyclopedia reveals a surprising range of resources and options that consumers have at their disposal The only book of its kind this two volume alphabetically arranged reference covers a broad array of topics related to consumer rights including those of interest to often overlooked populations such as older adults veterans and the homeless Specific entries address critical areas including food and product safety housing health care the financial industry the automobile industry and telecommunications The encyclopedia reviews the historical development of the
