Software Architecture: The Hard Parts Neal Ford, Mark Richards, Pramod Sadalage, Zhamak Dehghani, 2021-09-23

There are no easy decisions in software architecture. Instead, there are many hard parts, difficult problems or issues with no best practices that force you to choose among various compromises. With this book, you will learn how to think critically about the trade-offs involved with distributed architectures. Architecture veterans and practicing consultants Neal Ford, Mark Richards, Pramod Sadalage, and Zhamak Dehghani discuss strategies for choosing an appropriate architecture. By interweaving a story about a fictional group of technology professionals, the Sysops Squad, they examine everything from how to determine service granularity, manage workflows and orchestration, manage and decouple contracts, and manage distributed transactions to how to optimize operational characteristics such as scalability, elasticity, and performance. By focusing on commonly asked questions, this book provides techniques to help you discover and weigh the trade-offs as you confront the issues you face as an architect. Analyze trade-offs and effectively document your decisions. Make better decisions regarding service granularity. Understand the complexities of breaking apart monolithic applications. Manage and decouple contracts between services. Handle data in a highly distributed architecture. Learn patterns to manage workflow and transactions when breaking apart applications. **Good Housekeeping**, 1993 **H.R. 2440, Credit and Charge Card**

Approach To Business Growth Shantanu Bhattacharya, Lipika Bhattacharya, 2021-10-13 XaaS: Everything as a Service The Lean and Agile Approach to Business Growth takes the reader into the bold new world of pay-per-use for a product or service. From the perspective of the customer, the servitization model yields multiple benefits: the consumer can try out the product/service at a relatively low cost; the risk is mitigated; capital expenses can be converted into operating expenses; it is not needed to forecast how often the product/service is used; and only parts of the product/service needed can be used. Similarly, a provider can benefit by having a larger market coverage, steadier stream of revenues, upgrades as and when needed, sharing of fixed assets across consumers, practicing of value-based pricing, and unbundling or bundling utility for consumers using appropriate pricing techniques. However, this nanoization of products/services is tricky and has to be designed carefully. This book provides a set of recipes to providers to adopt the XaaS model by changing the provider's mindset, dividing the product

service forces the provider to take a value driven approach to his product service and consequently eliminate all non value added activities The requirements of the XaaS model serve both as an objective to the innovation and internal processes of the provider and as guide to understanding the customer s needs The book also covers data acquisition data analysis and synthesis and data application needs of the XaaS model with simple examples and case studies from the business world of firms that achieve these objectives successfully

Elliehausen,2014 Consumer Credit and the American Economy examines the economics behavioral science sociology history institutions law and regulation of consumer credit in the United States After discussing the origins and various kinds of consumer credit available in today s marketplace this book reviews at some length the long run growth of consumer credit to explore the widely held belief that somehow consumer credit has risen too fast for too long It then turns to demand and supply with chapters discussing neoclassical theories of demand new behavioral economics and evidence on production costs and why consumer credit might seem expensive compared to some other kinds of credit like government finance This discussion includes review of the economics of risk management and funding sources as well discussion of the economic theory of why some people might be limited in their credit search the phenomenon of credit rationing This examination includes review of issues of risk management through mathematical methods of borrower screening known as credit scoring and financial market sources of funding for offerings of consumer credit The book then discusses technological change in credit granting It examines how modern automated information systems called credit reporting agencies or more popularly credit bureaus reduce the costs of information acquisition and permit greater credit availability at less cost This discussion is followed by examination of the logical offspring of technology the ubiquitous credit card that permits consumers access to both payments and credit services worldwide virtually instantly After a chapter on institutions that have arisen to supply credit to individuals for whom mainstream credit is often unavailable including payday loans and other small dollar sources of loans discussion turns to legal structure and the regulation of consumer credit There are separate chapters on the theories behind the two main thrusts of federal regulation to this point fairness for all and financial disclosure Following these chapters there is another on state regulation that has long focused on marketplace

access and pricing Before a final concluding chapter another chapter focuses on two noncredit marketplace products that are closely related to credit The first of them debt protection including credit insurance and other forms of credit protection is economically a complement The second product consumer leasing is a substitute for credit use in many situations especially involving acquisition of automobiles This chapter is followed by a full review of consumer bankruptcy what happens in the worst of cases when consumers find themselves unable to repay their loans Because of the importance of consumer credit in consumers financial affairs the intended audience includes anyone interested in these issues not only specialists who spend much of their time focused on them For this reason the authors have carefully avoided academic jargon and the mathematics that is the modern language of economics It also examines the psychological sociological historical and especially legal traditions that go into fully understanding what has led to the demand for consumer credit and to what the markets and institutions that provide these products have become today
