Gea Micro 3 Manual:

Manual of Instructions for the Survey of Dominion Lands, ..., 1917 **Handbook for the Analysis of Micro-Particles in Archaeological Samples** Amanda G. Henry, 2020-07-07 This handbook provides a resource for those already familiar with some kinds of micro particles who wish to learn more about others or for those just starting out in the study of microremains who wish to have a broad understanding about microscopic archaeology Topics covered in this handbook include diatom microfossils starch granules pollen grains phytoliths natural fibers volcanic glass minerals insect remains and feathers Archaeological investigations increasingly rely on specialist identification of microscopic remnants found in sites These micro particles can provide information about the site environment and human activities that may not be apparent from artifacts and materials preserved on the macro scale and have given us new and often high profile information about our past The investigation of this invisible archaeology that is invisible to the naked eye is still somewhat new and generally each kind of micro particle is studied individually Researchers become experts in a narrow range of micro particle types but may be less familiar with or even completely unaware of the multitude of other forms that are frequently encountered in archaeological samples This handbook's accessible approach is suitable for those at the beginner level Manual of Instructions for the Survey of Dominion Lands Canada.
