Gender Swap At The Office English Edition:

Gender Swapped Fairy Tales Karrie Fransman, Jonathan Plackett, 2020-11-03 Discover a collection of fairy tales unlike the ones you've read before. Once upon a time in the middle of winter a King sat at a window and sewed. As he sewed and gazed out onto the landscape he pricked his finger with the needle and three drops of blood fell onto the snow outside. People have been telling fairy tales to their children for hundreds of years. And for almost as long people have been rewriting those fairy tales to help their children imagine a world where they are the heroes. Karrie and Jon were reading their child these stories when they hit upon a dilemma: something previous versions of these stories were missing and so they decided to make one vital change. They haven't rewritten the stories in this book. They haven't reimagined endings or reinvented characters. What they have done is switch all the genders. It might not sound like that much of a change but you'll be dazzled by the world this swap creates and amazed by the new characters you're about to discover.

Gender Change in Academia Birgit Riegraf, Brigitte Aulenbacher, Edit Kirsch-Auwärter, Ursula Müller, 2010-07-15
Editors Foreword The fundamental changes currently taking place in the national and international science landscapes can no longer be overlooked. Within those changes reforms do not go as planned but as is always the case with processes of rationalization have a series of unintended effects. At the same time it becomes increasingly clear who in this process are the winners and who are the losers although this is still subject to fluctuation and change. This can be illustrated by two examples from current events. Where the range of taught courses is concerned as part of the Bologna Process the new structuring of student study paths and their organisation is aimed at unifying the European area of science to ensure a study that is equally permissive and efficient. However it is to be deplored that the mobility of students has become more restricted because of an increasing specialisation in the available study paths. Also bachelor degrees do not meet with the anticipated high response from the labour market in all countries so that the master's degree is becoming more or less a must while at the same time the number of study places on master's courses is limited. Instead of the intended reduction in the duration of study time in comparison to the previous German Magister and Diplom rather a prolongation in the duration of studies has been recorded.

Gender, Change and Identity Barbara Merrill, 2019-06-04 First published in 1999 this volume centres on a case study which looks at the experiences of non traditional adult women students in universities from the perspective of the actors The interaction of structure and agency and the significance of macro and micro levels in shaping the behaviour attitudes and experiences of women adult students are examined by drawing on three perspectives feminism Marxism and interactionism An underlying question is to what extent did studying change the way participants perceived themselves as women It relates life histories to their student career as individuals and collectively as subcultural groups It also breaks new ground by including a sample of male adult students in order to compare and clarify gender issues It also uses macro and micro sociological theories as a tool for understanding the experiences of women at university and the relationship between their public and private lives The book concludes that studying for a degree represented an active decision to take greater control to break free from gender and class restraints and to transform individual lives The study aims to clarify and reassert the radical individual traditions within sociology feminism and adult education
