methods and basics skills for data collection presentation and analysis      Research Methodology Dr. Namita Gupta,2022-11-15      **EBOOK: Social Research** Tim May,2011-03-16 This fully revised and updated popular text successfully bridges the gap between theory and methods in social research clearly illuminating these essential components for understanding the dynamics of social relations The book is divided into two parts with part one examining the issues and perspectives in social research and part two setting out the methods and processes Updates to this edition include A new chapter on case study research A new concluding chapter Links to additional websites and IT applications that are integrated throughout the book Updated experiential examples and scenarios More international examples The clear writing style chapter summaries questions for reflection and signposts to further readings continue to make this book the ideal companion to social research for students across the social sciences In addition it will be recognised as an invaluable source of reference for those practising and teaching social research who wish to keep abreast of key developments in the field With contributions from Beth Perry University of Salford and Carole Sutton University of Plymouth      **Research strategies discussed by Martyn Denscombe in his book 'The Good Research Guide for small - scale social research projects** Rene Tetzner,2006-04-09 Essay from the year 2004 in the subject English Language and Literature Studies Literature grade A University of Bedfordshire Luton Business School 4 entries in the bibliography language English abstract When we carry out surveys we can not include everyone who belongs to the research group That is why we select a portion of the group and assume this portion applies equally to others of the group Mainly two groups of research techniques are used in the social research namely probability sampling and non probability sampling To the group of probability sampling belongs random sampling systematic sampling stratified sampling quota sampling cluster sampling and multi stage sampling They rely on the idea that the researcher has some notion the chosen sample represents the whole of the selection Included in the group of non probability sampling are purpose sampling snowball sampling theoretical sampling and convenience sampling basically it means we do not have enough information for the samples to represent a particular portion      Service Quality Measurement: Issues and Perspectives Lewlyn L. R. Rodrigues,2013-05-22 This book is very useful for it is not just descriptive in its nature but prescriptive too It is descriptive in the sense that it describes the process of developing or using a metric in a problem situation and prescriptive as it clearly prescribes how a beginner can put the theory into practice In this globalized economy maintaining quality of products and services has been the thrust area of interest among academicians and practitioners Today there are quite a good number of books and research articles available Nevertheless service quality measurement has always posed problems particularly in the context of service industries due to the difficulty in the measurement of the intangibles and implied needs of the customers The research literature is filled with articles on how to quantify the services and there are several streams of arguments on the choice of the most ideal approach However the research gap lies in the answer to the question Do these measurement instruments concur in their measurement

outcomes or do they give different results in the same situation This book primarily makes an attempt to answer this question through a case study approach Even though there are several instruments for the measurement of service quality the two most widely used instruments are SERVQUAL and SERVPERF metrics Comprehensively this book explains the systematic procedure of using both the instruments in a service sector and further the procedure for conducting a statistical analysis so that one will be able to apply the same in any service sector It then takes the reader through a series of tests in order to compare the two metrics and to prove statistically if there is the same outcome in a problem situation The results are sure to surprise the reader and trigger the research bent of mind to undertake a similar study of such metrics and gain mastery over performing an independent research with very minimal guidance from a professional guide
