special emphasis to user centered design and design for special populations particularly the elderly Virtual reality digital environments heuristic evaluation and feedback of devices interfaces visual and haptic are also among the topics covered in this book Based on the AHFE 2017 Conference on Usability User Experience held on July 17 21 2017 in Los Angeles California USA the book describes new findings research methods and user centered evaluation approaches Video Theory Andreas Treske,2015-04-15 Video is a part of everyday life comparable to driving a car or taking a shower It is nearly omnipresent available on demand and attached to nearly anything anywhere Online Video became something vital and independent With all the video created by the cameras around us constantly uploading sharing linking and relating a blue ocean is covering our planet an ocean of video What might look as bluish noise and dust from the far outside might embed beautiful and fascinating living scapes of moving images objects constantly changing re arranging assembling evolving collapsing but never disappearing a real cinema Andreas Treske describes and theorizes these objects formerly named video their forms behaviours and properties **Historical Ecology and Landscape Archaeology in Lowland South America** André Carlo Colonese,Rafael Guedes Milheira,2023-06-22 This edited volume scrutinizes how pre Columbian human societies have shaped and transformed lowland South America contributing to biological and landscape diversity This geographic area has supported human populations since at least the transition from the Pleistocene to Holocene but the nature and scale of these interactions are matters of debate and their legacy to modern lowland environments is not fully understood This book brings together works from distinct disciplines including theoretical and methodological approaches on single case studies or broad regional syntheses with no chronological constraint The editors aim to generate a novel contribution reporting the most recent and ground breaking research on human interactions with past environments and resources in lowland South America from pre Columbian to Colonial times The volume also discusses the legacy of these past interactions and their potential contribution to informing current conservation and development agendas providing examples of how archaeology and paleoecology can fill gaps in conservation and developmental policy This volume will be of interest to students archaeologists and readers of Latin American studies Neuropsychological Testing: From Psychometrics to Clinical Neuropsychology Alessio Facchin,Elisa Cavicchiolo,Edgar Chan,2025-02-10 Neuropsychological testing represents an essential part of the clinical examination of neuropsychological patients and these measures remain the primary instrument for clinical research in neuropsychology For these reasons old procedures were psychometrically investigated to assess their metrical properties As a result of the redesigned procedures old tests were improved in terms of their psychometric properties and characteristics The field of neuropsychological testing needs to be updated with new research in order to improve the clinical practice of neuropsychological testing the psychometric characteristics of new neuropsychological tests and the theories behind the testing in a circular way In this research topic we want to report recent advances and changes from old standard diagnostic testing to more recent procedures and methods in the area of cognitive testing Applications

comparisons novel definitions and measures updated procedures and psychometric properties of existing instruments measurement invariance reliability repeatability specific norms particular applications and use in specific patients are all welcome Open access tests methods and procedures are encouraged together with studies that follow the Open Science initiative This topic joins two different backgrounds in this area of research psychometrics and neuropsychology and all studies in these areas will be considered included reviews and meta analyses

Unmanned Aerial Remote Sensing David R. Green, 2020-07-10 Unmanned Aircraft Systems UAS are a rapidly evolving technology with an expanding array of diverse applications In response to the continuing evolution of this technology this book discusses unmanned aerial vehicles UAVs and similar systems platforms and sensors as well as exploring some of their environmental applications It explains how they can be used for mapping monitoring and modeling a wide variety of different environmental aspects and at the same time addresses some of the current constraints placed on realizing the potential use of the technology such as s flight duration and distance safety and the invasion of privacy etc Features of the book Provides necessary theoretical foundations for pertinent subject matter areas Introduces the role and value of UAVs for geographical data acquisition and the ways to acquire and process the data Provides a synthesis of ongoing research and a focus on the use of technology for small scale image and spatial data acquisition in an environmental context Written by experts of the technology who bring together UAS tools and resources for the environmental specialist Unmanned Aerial Remote Sensing UAS for Environmental Applications is an excellent resource for any practitioner utilizing remote sensing and other geospatial technologies for environmental applications such as conservation research and planning Students and academics in information science environment and natural resources geosciences and geography will likewise find this comprehensive book a useful and informative resource

3D Recording and Interpretation for Maritime Archaeology John K. McCarthy, Jonathan Benjamin, Trevor Winton, Wendy van Duivenvoorde, 2019-03-06 This open access peer reviewed volume was inspired by the UNESCO UNITWIN Network for Underwater Archaeology International Workshop held at Flinders University Adelaide Australia in November 2016 Content is based on but not limited to the work presented at the workshop which was dedicated to 3D recording and interpretation for maritime archaeology The volume consists of contributions from leading international experts as well as up and coming early career researchers from around the globe The content of the book includes recording and analysis of maritime archaeology through emerging technologies including both practical and theoretical contributions Topics include photogrammetric recording laser scanning marine geophysical 3D survey techniques virtual reality 3D modelling and reconstruction data integration and Geographic Information Systems The principal incentive for this publication is the ongoing rapid shift in the methodologies of maritime archaeology within recent years and a marked increase in the use of 3D and digital approaches This convergence of digital technologies such as underwater photography and photogrammetry 3D sonar 3D virtual reality and 3D printing has highlighted a pressing need for these new methodologies to be considered

together both in terms of defining the state of the art and for consideration of future directions As a scholarly publication the audience for the book includes students and researchers as well as professionals working in various aspects of archaeology heritage management education museums and public policy It will be of special interest to those working in the field of coastal cultural resource management and underwater archaeology but will also be of broader interest to anyone interested in archaeology and to those in other disciplines who are now engaging with 3D recording and visualization **HCI**
