The Pursuit of Human Well-Being Richard J. Estes, M. Joseph Sirgy, 2017-01-09 This handbook informs the reader about how much progress we the human race have made in enhancing the quality of life on this planet. Many skeptics focus on how the quality of life has deteriorated over the course of human history particularly given World War II and its aftermath. This handbook provides a positive perspective on the history of well being. Quality of life as documented by scientists worldwide has significantly improved. Nevertheless one sees more improvements in well being in some regions of the world than in others. Why? This handbook documents the progress of well being in the various world regions as well as the differences in those regions. The broad questions that the handbook addresses include: What does well being mean? How do different philosophical and religious traditions interpret the concept of well being within their own context? Has well being remained the same over different historical epochs and for different regions and subregions of the world? In which areas of human development have we been most successful in advancing individual and collective well being? In which sectors has the attainment of well being proven most difficult? How does well being differ within and between different populations groups that for a variety of socially created reasons have been the most disadvantaged e.g. children, the aged, women, the poor, racial, ethnic and sexual minorities.

Powers, inequalities and vulnerabilities Johannes J. Knoetze, Valentin Kozhuharov, 2020-12-31 This research addresses the gap that is present in both missiology and family and youth ministry. Missiology does not focus on children and youth specifically while this is the largest

population in the developing world On the other hand family and youth ministry has a more pastoral than missional approach not always taking cognisance of contexts like globalisation Thus the purpose of the book is to address the sometimes unintended and unnoticed influence of globalisation on the mission of the church with a specific focus on children youth and family For this purpose the International Association for Mission Studies study group for children youth and families coming from different parts of the world decided to describe the powers inequalities and vulnerabilities of children youth and families in a globalised world from their specific contexts Although the most prominent research methodology was critical literature studies methods like autoethnographic and empirical methods were also used No decisions were made on a specific method of research for this publication This publication can be viewed as an interdisciplinary and intra disciplinary because it deals with social sciences anthropology psychology missiology systematic theology and practical theology *Reforming Education and Challenging Inequalities in Southern Contexts* Pauline Rose, Madeleine Arnot, Roger Jeffery, Nidhi Singal, 2021-03-24 This book offers in depth analyses of how education interacts with social inequality in Southern contexts Drawing on a range of disciplinary frameworks it presents new analyses of existing knowledge and new empirical data which define the challenges and possibilities of successful educational reform It is a tribute to the work of the late Christopher Colclough who as a leading figure in education and international development played a key role in the global fight for education for all children The book critically engages with international evidence of educational access retention and outcomes offering new understandings of how social inequalities currently facilitate mediate or restrict educational opportunities It exposes the continuing influence of wealth and regional inequalities and caste and gendered social structures Researchers in Ethiopia Ghana India Pakistan and Uganda highlight how the aspirations of families living in poverty remain unfilled by poor quality education and low economic opportunities and how schools and teachers currently address issues of gender disability and diversity The book highlights a range of new priorities for research and identifies some necessary strategies for education reform policy approaches and school practice if educational equality for all children is to be achieved The book will be of great interest to researchers scholars educational practitioners and policy makers in the fields of economics politics and sociology of education international education poverty research and international development The Foreword Chapters 1 6 7 and 12 of this book are freely available as downloadable Open Access PDFs at <https://www.taylorfrancis.com/books/e/9780429293467> under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license Foreword Chapters 1 6 and 12 and a Creative Commons Attribution 4.0 license Chapter 7
