History Paper 1 November 2013:

Academic Publishing David Coniam, Peter Falvey, 2022-10-02 This book focuses on the topic of academic publishing. It discusses the mounting serious problems that researchers, particularly new researchers, encounter when trying to publish their research. The book addresses the issues of publishing as well as the salient factors militating against academic publication and the mitigating factors encouraging academic publication. It provides potential solutions, suggestions, and strategies for overcoming some of these problems. Growing research output from Southeast Asia, including Singapore, Malaysia, Taiwan, and China, reveals the struggles that many authors have to confront when attempting to publish their work in reputable journals. In both South Africa and other parts of Africa, academic researchers are beginning to show strong evidence of credible academic output. These researchers all need valid outlets for their work and the security that authentic peer review brings to the reviewing process. In the fields of education, social sciences, and professional practices, e.g., architecture and law, recent years have seen the emergence of new outlets for practitioners' research outputs in areas such as one's own practice, self-reflection, and narrative inquiry. These outlets are discussed in this book. The book also discusses the malign influence of predatory publications in detail. This book will be beneficial to university academics, postgraduate students, Ph.D. supervisors, and new researchers.

The Routledge History of Fashion and Dress, 1800 to the Present Veronique Pouillard, Vincent Dubé-Sénécal, 2023-10-24 The time span covered by *The Routledge History of Fashion and Dress* starts in the nineteenth century with the aftermath of the consumers revolution and reaches all the way to the present. The fashion and garment industries have been international from the beginning, and as such, this volume looks at the history of fashion and dress through the lenses of both international and global history. Because fashion is also a multifaceted subject with human agency at its core, at the confluence of the material (fabrics, clothing, dyes, tools, and machines) and the immaterial (savoir faire, identities, images, and brands), this volume adopts a transdisciplinary perspective, opening its pages to researchers from a variety of complementary fields. The chapters in this volume are organized based on their relationship to five fields of study: economics and commerce, politics, business, identities, and historical sources. Paying particular attention to change, the book goes beyond the great fashion capitals and well-known fashion centers and points to the broader geographies of fashion. Particular geographical areas focus on the emergence of new fashion systems and business models, whether they be in Sweden, Bangladesh, or Spain, or on the African continent, considered to be the new frontier of the industry. Covering myriad aspects of the subject, this is the perfect companion for all those interested in the history of dress and fashion in the modern world.

Malcolm Fraser,Cain Roberts,2016-04-12 Australia has always been reliant on great and powerful friends for its sense of national security and for direction on its foreign policy first on the British Empire and now on the United States Australia has actively pursued a policy of strategic dependence believing that making a grand bargain with a powerful ally was the best policy to ensure its security and prosperity Dangerous Allies examines Australia s history of strategic dependence and questions the continuation of this position It argues that international circumstances in the world and in the Western Pacific especially now make such a policy highly questionable Since the fall of the Soviet Union the United States has also changed dramatically making it less relevant to Australia and a less appropriate ally on which Australia should rely Malcolm Fraser argues that Australia should adopt a much greater degree of independence in foreign policy and that we should no longer merely follow other nations into wars of no direct interest to Australia or Australia s security He argues for an end to strategic dependence and for the timely establishment of a truly independent Australia **The Age of Scientific**

Naturalism Bernard Lightman,Michael S. Reidy,2016-02-19 Physicist John Tyndall and his contemporaries were at the forefront of developing the cosmology of scientific naturalism during the Victorian period They rejected all but physical laws as having any impact on the operations of human life and the universe Contributors focus on the way Tyndall and his correspondents developed their ideas through letters periodicals and scientific journals and challenge previously held assumptions about who gained authority and how they attained and defended their position within the scientific community

Crisis Communication in a Digital World Mark Sheehan, Deirdre Quinn-Allan, 2015-04-15 Crisis Communication in a Digital World provides an introduction to major crisis communication theories and issues management using practical examples from Australia and New Zealand. The book examines how public relations can influence the nature of a crisis and the impact of its aftermath. It explores the role of PR specialists in different crisis situations including natural disasters and morphing crises and examines the challenges they face in a world where social media is a key source of communication. Readers are provided with an in-depth understanding of crisis communication and issues management through practical approaches, strategies and skills which are supplemented by relevant theories based on evidence and experience. Social Finance Alex Nicholls, Rob Paton, Jed Emerson, 2015-11-05 Social Finance is a rapidly advancing area of practice, policy and research with a lot of unanswered questions. What does it amount to? What is it to be social in finance? How do you value assets that offer a social as well as a financial return? This book provides a collection of authoritative essays on these and related topics. The essays embrace the different manifestations of social finance, collate existing research, set out the controversies, offer theoretical insights and advances and draw together the ideas of the leading thinkers in the field. Contributors to this volume are leading exponents and practitioners of social finance and leading academics from the main relevant disciplines and fields of study. This book is the first serious and comprehensive treatment of social finance and as such will be of interest to academics with research and teaching interests in finance, social enterprise, entrepreneurship, public policy, business, economics and international development to name a few. If you want to understand and join in the academic and policy debates or if you are working in one part of this field and want to understand how the landscape is being rapidly re-shaped, then this is an essential guidebook.
