Contemporary Hollywood Evdokia Stefanopoulou, 2023-07-27 The Science Fiction Film in Contemporary Hollywood focuses on the American science fiction SF film during the period 2001-2020 in order to provide a theoretical mapping of the genre in the context of Conglomerate Hollywood. Using a social semiotics approach in a systematic corpus of films, the book argues that the SF film can be delineated by two semiotic squares: the first one centering on the genre's more than human ontologies, SF bodies, and the second one focusing on its imaginative worlds, SF worlds. Based on this theoretical framework, the book examines the genre in six cycles which are placed in their historical context and are analyzed in relation to cultural discourses such as technological embodiment, race, animal/human relations, environmentalism, global capitalism, and the techno-scientific Empire. By considering these cycles, which include superhero films, creature films, space operas, among others, as expressions of the genre's basic oppositions, the book facilitates the comparison and juxtaposition of films that have rarely been discussed in tandem, offering a new perspective on the multiple articulations of the SF film in the new millennium.

The Ultimate Hitchhiker's Guide Douglas Adams, 2005-6 Science fiction romaner Picking Up Robin Nagle, 2013-03-19 A gripping behind-the-scenes look at New York's sanitation workers by an anthropologist who joined the force. Robert Sullivan, author of *Rats*, America's largest city generates garbage in torrents: 11,000 tons from households each day on average. But New Yorkers don't give it much attention. They leave their trash on the curb or drop it in a litter basket and promptly forget about it. And why not? On a schedule so regular you could almost set your watch by it, someone always comes to take it away. But who exactly is that someone? And why is he or she so unknown? In *Picking Up*, the anthropologist Robin Nagle introduces us to the men and women of New York City's Department of Sanitation and makes clear why this small army of uniformed workers is the most important labor force on the streets. Seeking to understand every aspect of the Department's mission, Nagle accompanied crews on their routes, questioned supervisors and commissioners, and listened to story after story about blizzards, hazardous wastes, and the insults of everyday New Yorkers. But the more time she spent with the DSNY, the more Nagle realized that observing wasn't quite enough, so she joined the force herself. Driving the hulking trucks, she obtained an insider's perspective on the complex kinships, arcane rules, and obscure lingo unique to the realm of sanitation workers. Nagle chronicles New York City's four-hundred-year struggle with trash and traces the city's waste management efforts from a time when filth overwhelmed the streets to the far more rigorous practices of today when the Big Apple is as clean as it's ever been. An intimate look at the mostly male work force as they risk injury and endure insult while doing the city's dirty work, and a fascinating capsule history of the department. *Publishers Weekly*: Nagle's passion for the subject really comes to life. *The New York Times*: Evokes the physical and psychological toll of this dangerous, filthy, necessary work. *Nature*: Nagle joins the likes of Jane Jacobs and Jacob Riis, writers with thechutzpah to dig deep into the Rube Goldberg machine we call the Big Apple, and emerges with a lyrical, clear-eyed look at how it works. *Mother Jones* **Institutions and Trade Policy** J. M. Finger, 2002-01-01 This book reprints eighteen essays selected from almost thirty years of work by the

author as a high level official at the UN Conference on Trade and Development **Robot Suicide** Liz W. Faber,2023-05-01 In *Robot Suicide* Death Identity and AI in Science Fiction Liz W Faber blends cultural studies philosophy sociology and medical sciences to show how fictional robots hold up a mirror to our cultural perceptions about suicide and can help us rethink real world policies regarding mental health For decades we ve been asking whether we could make a robot live but a new question is whether a living robot could make itself die And if it could how might we humans react Suicide is a longstanding taboo in Western culture particularly in relationship to mental health marginalized identities and individual choice But science fiction offers us space to tackle the taboo by exploring whether and under what circumstances robots as metaphorical stand ins for humans might choose to die Faber looks at a broad range of science fiction from classics like *The Terminator* franchise to recent hits like C Robert Cargill s novel *Sea of Rust* *Popular Modernism and Its Legacies* Scott Ortolano,2017-12-14 *Popular Modernism and Its Legacies* reconfigures modernist studies to investigate how modernist concepts figures and aesthetics continue to play essential though often undetected roles across an array of contemporary works genres and mediums Featuring both established and emerging scholars each of the book s three sections offers a distinct perspective on popular modernism The first section considers popular modernism in periods historically associated with the movement discovering hidden connections between traditional forms of modernist literature and popular culture The second section traces modernist genealogies from the past to the contemporary era ultimately revealing that immensely popular contemporary works artists and genres continue to engage and thereby renew modernist aesthetics and values The final section moves into the 21st century discovering how popular works invoke modernist techniques texts and artists to explore social and existential quandaries in the contemporary world Concluding with an afterword from noted scholar Faye Hammill *Popular Modernism and Its Legacies* reshapes the study of modernism and provides new perspectives on important works at the center of our cultural imagination **From a to B** David Axe,2014-05-27 What America does best **One is Never Alone with a Rubber Duck** Marillette van der Colff,2010-08-11 What do existential elevators sentient mattresses paranoid androids humans and other aliens have in common For one thing they want answers The fact yes fact that there are no answers except perhaps for 42 causes some humans and other aliens to face this empty madness we call life with Sisyphus like defiance Others choose to sulk or skulk or annihilate themselves Another thing these creatures have in common is that they are all born mad and some remain so *One is never alone with a rubber duck* explores the premise that Douglas Adams s *Hitchhiker Series* is not merely characterised by light hearted comedy but is underpinned by intricate philosophical ideas especially those of twentieth century Existentialism and the related notion of absurdity It also investigates the interlaced functions of Adams s fantasy and landscapes of alterity and considers the ambiguous concept of madness as subjective reality Concepts related to alterity such as simulation the structure of reality dreaming and parallel universes are investigated as part of Adams s fantastic story space In a science fictional sense Adams s aliens satirise the human condition and the

monstrosities that lurk at the heart of twentieth century society **Alien Listening** Daniel K. L. Chua, Alexander Rehding, 2021-09-14 An examination of NASA's Golden Record that offers new perspectives and theories on how music can be analyzed, listened to and thought about by aliens and humans alike. In 1977 NASA shot a mixtape into outer space. The Golden Record aboard the Voyager spacecrafts contained world music and sounds of Earth to represent humanity to any extraterrestrial civilizations. To date the Golden Record is the only human made object to have left the solar system. Alien Listening asks the big questions that the Golden Record raises. Can music live up to its reputation as the universal language in communications with the unknown? How do we fit all of human culture into a time capsule that will barrel through space for tens of thousands of years? And last but not least, Do aliens have ears? The stakes could hardly be greater. Around the extreme scenario of the Golden Record, Chua and Rehding develop a thought provoking, philosophically heterodox and often humorous Intergalactic Music Theory of Everything, a string theory of communication, an object oriented ontology of sound and a Penelopean model woven together from strands of music and media theory. The significance of this exomusicology, like that of the Golden Record, ultimately takes us back to Earth and its denizens. By confronting the vast temporal and spatial distances the Golden Record traverses, the authors take listeners out of their comfort zone and offer new perspectives in which music can be analyzed, listened to and thought about by aliens and humans alike. Nama, 2010-01-01 Winner Rollins Book Award Southwest Texas Popular Culture Association American Culture Association 2008 Science fiction film offers its viewers many pleasures, not least of which is the possibility of imagining other worlds in which very different forms of society exist. Not surprisingly, however, these alternative worlds often become spaces in which filmmakers and film audiences can explore issues of concern in our own society. Through an analysis of over thirty canonic science fiction SF films including Logan's Run, Star Wars, Blade Runner, Back to the Future, Gattaca and Minority Report, Black Space offers a thoroughgoing investigation of how SF film since the 1950s has dealt with the issue of race and specifically with the representation of blackness. Setting his study against the backdrop of America's ongoing racial struggles and complex socioeconomic histories, Adilifu Nama pursues a number of themes in Black Space. They include the structured absence, token presence of blacks in SF film, racial contamination and racial paranoia, the traumatized black body as the ultimate signifier of difference, alienness and otherness, the use of class and economic issues to subsume race as an issue, the racially subversive pleasures and allegories encoded in some mainstream SF films and the ways in which independent and extra-filmic productions are subverting the SF genre of Hollywood filmmaking. The first book-length study of African American representation in science fiction film, Black Space demonstrates that SF cinema has become an important field of racial analysis, a site where definitions of race can be contested and post-civil rights race relations reimagined. **The Social Organism** Oliver Luckett, Michael Casey, 2016-11-15 A must-read for business leaders and anyone who wants to understand all the implications of a social world.
