FSR Definition

What is a feasibility study report (FSR)? In simple terms, it's just a document that aims to identify, explore, and evaluate a project's solutions to save time and money. The following definition gives a broader understanding of the document:

A **Feasibility Study Report (FSR)** is a formally documented output of feasibility study that summarizes results of the analysis and evaluations conducted to review the proposed solution and investigate project alternatives for the purpose of identifying if the project is really feasible, cost-effective and profitable.
