UNESCO science report

UNESCO, 2015-11-09 There are fewer grounds today than in the past to deplore a North South divide in research and innovation This is one of the key findings of the UNESCO Science Report towards 2030 A large number of countries are now incorporating science technology and innovation in their national development agenda in order to make their economies less reliant on raw materials and more rooted in knowledge Most research and development R D is taking place in high income countries but innovation of some kind is now occurring across the full spectrum of income levels according to the first survey of manufacturing companies in 65 countries conducted by the UNESCO Institute for Statistics and summarized in this report For many lower income countries sustainable development has become an integral part of their national development plans for the next 10 20 years Among higher income countries a firm commitment to sustainable development is often coupled with the desire to maintain competitiveness in global markets that are increasingly leaning towards green technologies The quest for clean energy and greater energy efficiency now figures among the research priorities of numerous countries Written by more than 50 experts who are each covering the country or region from which they hail the UNESCO Science Report towards 2030 provides more country level information than ever before The trends and developments in science technology and innovation policy and governance between 2009 and mid 2015 described here provide essential baseline information on the concerns and priorities of countries that could orient the implementation and drive the assessment of the 2030 Agenda for Sustainable Development in the years to come

Beyond Technonationalism

Kathryn C. Iбата-Arens, 2019-04-16 The biomedical industry which includes biopharmaceuticals genomics and stem cell therapies and medical devices is among the fastest growing worldwide While it has been an economic development target of many national governments Asia is currently on track to reach the epicenter of this growth What accounts for the rapid and sustained economic growth of biomedical in Asia To answer this question Kathryn Iбата Arens integrates global and national data with original fieldwork to present a conceptual framework that considers how national governments have managed key factors like innovative capacity government policy and firm level strategies Taking China India Japan and Singapore in turn she compares each country s underlying competitive advantages

What emerges is an argument that countries pursuing networked technonationalism NTN effectively upgrade their capacity for innovation and encourage entrepreneurial activity in targeted industries In contrast to countries that engage in classic technonationalism like Japan s developmental state approach networked technonationalists are global minded to outside markets while remaining nationalistic within the domestic economy By bringing together aggregate data at the global and national level with original fieldwork and drawing on rich cases Ibata Arens telegraphs implications for innovation policy and entrepreneurship strategy in Asia and beyond

Theology, Science and Life Carmody Grey,2023-01-26 Offering a bold intervention in the ongoing debate about the relationship between theology and science Theology Science and Life proposes that the strong demarcation between the two spheres is unsustainable theology occurs within and not outside what we call science and science occurs within and not outside theology The book applies this in a penetrating way to the most topical contentious and philosophically charged science of late modernity biology Rejecting the easy dualism of expressions such as theology and science theology or science modern biology is examined so as to illuminate the nature of both In making this argument the book achieves two further things It is the first major English language reception and application of the thought of philosopher Hans Jonas in theology and it makes a decisive contribution to the unfolding reception of Radical Orthodoxy one of the most influential schools in contemporary Anglophone theology
