Technological Innovation in Legacy Sectors William B. Bonvillian, Charles Weiss, 2015-08-18 The American economy misses opportunities for innovation growth and job creation because of a neglected problem: the resistance to innovation from legacy sectors like energy, manufacturing, and health care, which constitute most of our economy. The book offers systematic strategies to overcome the structural obstacles to innovation in critically important legacy sectors. Marshak, 2022-01-25 By examining a suite of over 90 indicators for 9 major US fishery ecosystem jurisdictions, the authors systematically track the progress the country has made towards advancing EBFM and making it an operational reality, lessons which are applicable to oceans globally. *The Loss of Small White Clouds* Morgan Batch, 2023-08-09 This volume seeks to instigate a discussion about dementia in theatre. The discussions in this book borrow from the literature on dementia's representation in other artforms while reflecting on theatre's unique capacity to incorporate multiple artforms in a live context: hypermediacy. The author examines constructions of diegesis and the use of various performance tools including physical theatre, puppetry, and postdramatic performance. She discusses stage representations of interior experiences of dementia, selfhood in dementia, the demarcation of those with

dementia from those without endings erasure and the pursuit of catharsis placelessness and disruptions of traditional dramatic constructions of time and ultimately performances creatively led by people with dementia The book traces patterns of narrativisation on the stage including common dramaturgical forms settings and character relationships as well as examples that transcend mainstream representation This book is important reading for theatre and performance students scholars and practitioners as well as cultural studies writers engaged in research about narratives of dementia *Successes at the Interface of Ocean, Climate and Humans* Nancy Knowlton, Emanuele Di Lorenzo, Fiorenza Micheli, Christopher B. Holmes, 2017-12-12 A former U S Assistant Secretary of State and currently Acting Senior Vice President for Research at The Heritage Foundation Kim R Holmes surveys the state of liberalism in America today and finds that it is becoming its opposite illiberalism abandoning the precepts of open mindedness and respect for individual rights liberties and the rule of law upon which the country was founded and becoming instead an intolerant rigidly dogmatic ideology that abhors dissent and stifles free speech Tracing the new illiberalism historically to the radical Enlightenment a movement that rejected the classic liberal ideas of the moderate Enlightenment that were prominent in the American Founding Holmes argues that today s liberalism has forsaken its American roots incorporating instead the authoritarian anti clerical and anti capitalist prejudices of the radical and largely European Left The result is a closing of the American liberal mind Where once freedom of speech and expression were sacrosanct today liberalism employs speech codes trigger warnings boycotts and shaming rituals to stifle freedom of thought expression and action It is no longer appropriate to call it liberalism at all but illiberalism a set of ideas in politics government and popular culture that increasingly reflects authoritarian and even anti democratic values and which is devising new strategies of exclusiveness to eliminate certain ideas and people from the political process Although illiberalism has always been a temptation for American liberals lurking in the radical fringes of the Left it is today the dominant ideology of progressive liberal circles This makes it a new danger not only to the once venerable tradition of liberalism but to the American nation itself which needs a viable liberal tradition that pursues social and economic equality while respecting individual liberties *Nigeria - Politics, Religion, Pentecostal-Charismatic Power and Challenges* Akintayo Emmanuel, 2023-10-13 Nigeria presents an enthralling case study for understanding developing archetypes in interreligious encounters in Africa The global community needs a cultural understanding and sensitivity for productive engagement with
