Social Policy Kepa Artaraz, Liz Cunningham, Michael Hill, 2016-06-29 Social policy is a subject that helps develop our understanding of the meaning of human wellbeing and of the systems by which wellbeing must be promoted As a discipline social policy has traditionally been blunted by a focus on the nation state however in this age of globalisation the most pressing challenges such as climate change ageing populations and flagging economies serve as proof that even at national level social policy is now more heavily influenced by global factors than ever before In this important and authoritative text Kepa Artaraz and Michael Hill provide a richly detailed contribution to our understanding of the global forces shaping social problems today Part One discusses the different approaches to social policy and explores the process of globalisation looking particularly at its winners and losers and the implications it has for human well being Part Two examines more closely the key actors in global social policy such as the market the state and international organisations and Part Three provides an opportunity to explore some specific key issues of global importance such as employment and migration demographic change and global poverty Adding considerable momentum to the movement away from a reductionist nationally focused study of the discipline Global Social Policy opens up new and stimulating discussions and provides a fresh framework for the study of human well being Using policy examples from areas around the world to provide a truly international scope it is an essential read for students studying at all levels *Principles of Clinical Medicine for Space Flight* Michael R. Assured Destruction David Bath,2020-03-15 Assured Destruction Building the Ballistic Missile Culture of the U S Air Force documents the rapid development of nuclear ballistic missiles in the United States and their equally swift demise after the Cuban Missile Crisis revealing how these drastic changes negatively influenced both the Air Force and the missile community David W Bath contends that the struggle to create and control nuclear ballistic missiles threatened both the dominance of the United States during an intensifying Cold War and the strategic airpower mission of the newly created Air Force The book details the strenuous efforts required to create and prepare a missile arsenal before the Cuban Missile Crisis which occurred only five years after the first missile was declared operational It uses the personal recollections of former missileers and the professional military education theses they wrote to highlight some of the concerns that have faced the missileers who operated and worked on these powerful weapons from 1957 to the present The highlight of the book however is the personal stories of the missileers who served during the missile crisis revealing the efforts that they went to in order to prepare these unique and untried weapons for what many thought might become the third world war

The Rhetorical Invention of America's National Security State Marouf Hasian Jr.,Sean Lawson,Megan D. McFarlane,2015-07-29 The Rhetorical Invention of America s National Security State examines the rhetoric and discourse produced by and constitutive of America s national security state Hasian Lawson and McFarlane illustrate the importance of rhetoric to the expansion of the American national security state in the post 9 11 era through their examination of the global war on terrorism enhanced interrogation techniques drone crew stress activities of Edward Snowden rise of Special Forces and popular representations of counterterrorism The coauthors contend this expansion was not the result of lone imperial executives or a nefarious state within a state but was co produced by elite and non elite Americans alike who not only condoned but also in many cases demanded the expansion of the national security state This work will be of interest to scholars in communication studies and political science

Governomics Ian McAuley,Miriam Lyons,2015-05-01 People have good reason to demand decent public education and a well funded health system to yearn for an economy that doesn t trash the environment or for a smaller gap between rich and poor Almost without exception sound economics is on their side We ve grown used to public debates that pit people and the planet against an abstract distorted image of the economy but it doesn t have to be this way Governomics shows that an emaciated state is bad for business and that standing up for government means standing up for a public sector that truly serves the public Everybody knows governments are wasteful incompetent and a drag on the economy But if you re not sure that s true read this book Ross Gittins Sydney Morning Herald and The Age Governomics shows that a market economy can only work when sustained by a strong and active public sector It will inject some much needed economic sanity into conversations on the role of government in Australia John Quiggin Australian Research Council Laureate Fellow University of Queensland

MAPPING CONFLICT IN CHITTAGONG HILL TRACTS 1997-2014 Zahid ul Arefin Choudhury, 2020-04-27 The issue of the Chittagong Hill Tracts is as divisive as the region itself At one end there are tales of woe how the original inhabitants of the region are being evicted from their land through violence and trickery their marginalization and elimination of their traditional way of life simultaneously while it is being exoticized for tourism These accounts however paint a static picture where the members of these ethnic groups are victims always and without any agency Consequently these accounts fail to hold up in front of close examination and invites counter opinion rage that the Bengali and other ethnicities of CHT are prevented from living in harmony by disruptive elements within the society that the oppression and repression of the hill peoples are made up stories that feed national and international conspiracies In *Conflict Mapping in the Chittagong Hill Tracts* researchers from the Department of Peace and Conflict Studies at the University of Dhaka cut through this fog of confusion by presenting dispassionate unornamented data With the help of original data and systematic analysis they show how the social life of CHT is marked by deep polarization both within and across the ethnic divide how it is beset by real and perceived accounts of discrimination and by lack of confidence on state agencies and the rule of law They also investigate the trajectory of major cases of violence in the region in the past two decades and reveal that these have a common escalation pattern with various points marked by missed opportunities for prevention Based on a study that draws from a large survey of a cross section of people from 8 of the most crime prone Upazilas of the region semi structured interview of selected elites and analysis of the dynamics of 14 incidents of large scale violence between 1997 and 2014 this book aims at initiating a healthy constructive conversation on the issue It challenges long held prejudices common sense beliefs and unsubstantiated propaganda By offering the lens of social science the book invites readers with well meaning but vague opinions as well as consumers of zealous and spoon fed ideas to form informed and nuanced opinion *How Data Happened* Chris Wiggins, Matthew L. Jones, 2023-03-21 Fascinating Jill Lepore The New Yorker A sweeping history of data and its technical political and ethical impact on our world From facial recognition capable of checking people into flights or identifying undocumented residents to automated decision systems that inform who gets loans and who receives bail each of us moves through a world determined by data empowered algorithms But these technologies didn't just appear they are part of a history that goes back centuries from the census enshrined in the US Constitution to the birth of eugenics in Victorian Britain to the development of Google search Expanding on the popular course they created at Columbia University Chris Wiggins and Matthew L Jones illuminate the ways in which data has long been used as a tool and a weapon in arguing for what is true as well as a means of rearranging or defending power They explore how data was created and curated as well as how new mathematical and computational techniques developed to contend with that data serve to shape people ideas society military operations and economies Although technology and mathematics are at its heart the story of data ultimately concerns an unstable game among states corporations and people How were new technical and scientific capabilities developed who

supported advanced or funded these capabilities or transitions and how did they change who could do what from what and to whom Wiggins and Jones focus on these questions as they trace data's historical arc and look to the future By understanding the trajectory of data where it has been and where it might yet go Wiggins and Jones argue that we can understand how to bend it to ends that we collectively choose with intentionality and purpose

The Continuing Imperialism of Free Trade

Jo Grady, Chris Grocott, 2018-10-08 In 1953 John Gallagher and Ronald Robinson shook the foundations of imperial history with their essay The Imperialism of Free Trade They reshaped how historians saw the British empire focussing not on the red bits on the map and the wishes of policy makers in London but rather on British economic and political influence globally Expanding on this analysis this volume provides an examination of imperialism which brings the reader right up to the present This book offers an innovative assessment and analysis of the history and contemporary status of imperial control It does so in four parts examining the historical emergence and traditions of imperialism the relationships between the periphery and the metropolitan the role of supranational agencies in the extension of imperial control and how these connect to financialisation and international political economy The book provides a dynamic and unique perspective on imperialism by bringing together a range of contributors both established and up and coming scholars activists and those from industry from a wide range of disciplines and backgrounds In providing these authors a space to apply their insights this engaging volume sheds light on the practical implications of imperialism for the contemporary world With a broad chronological and geographical sweep this book provides theoretical and empirical engagements with the nature of imperialism and its effects upon societies It will be of great interest to a broad range of disciplines across the humanities and social sciences especially those working in History Politics and Management and Organisation Studies

Risk Regulation in the Internal Market

Maria Weimer, 2019-03-13 This book offers a topical inquiry into the legal and political limits of EU regulation in the field of risk and new technologies surrounded by techno scientific complexity uncertainty and societal contestation It uses agricultural biotechnology as a paradigmatic example to illustrate the complex intertwinement between environmental public health economic and social concerns in risk regulation Weimer analyses the drawbacks of the EU approach to agricultural biotechnology showing that its reductionism i.e. the narrow understanding of GMO risks as well as the exclusion of broader societal concerns related to environmental and social sustainability has undermined both the legitimacy and effectiveness of EU regulation in this area Resistance to this approach however has also triggered legal innovations prompting us to re think EU internal market law including the way in which it manages the tensions between unity and diversity and between social and economic concerns This text offers fresh and original insights into how far the EU can go in harmonizing regulatory approaches to risk At the same time it proposes new ways of re thinking EU risk regulation to make it more responsive to different perspectives on risk and technology A unique feature of this book is that it contributes to various strains of scholarship including risk regulation internal market law public administration and studies of governance and regulation as

well as connecting these themes to broader debates about the legitimacy of European integration and new ways of differentiated integration. As a result, it assists in re-imagining the EU internal market and its regulation as a site of diversity.
