World Yearbook of Education 2015 Agnès van Zanten, Stephen J. Ball, Brigitte Darchy-Koechlin, 2015-02-11 This latest volume in the World Yearbook of Education Series focuses on educational elites and inequality focusing particularly on the ways in which established and emergent groups located at the top of the social hierarchy and power structure reproduce establish or redefine their position The volume is organized around three main issues analyzing the way in which parents students and graduates in positions of social advantage use their assets and capitals in relation to educational strategies and how these are different for old and new and cultural and economic elites studying how elite institutions have adapted their strategies to take into account changes in the social structure in policy and in their institutional environment and exploring the impact of these strategies on educational systems at the national and global levels mapping the new global dynamics in elite education and how new forms of international education and transnational cultural capital as well as new global educational elite pathways shape elite students identities status and trajectories Making use of a social and an institutional approach as well as a focus on practices and policies the volume draws on research conducted on secondary schools and on higher education In addition the global contributions within the book allow for a comparison and contrast of situations in different countries This results in a comprehensive picture of common processes and national differences concerning advantage and excellence and a thorough examination of the impact of globalization on the strategies identities and trajectories of elite groups and individuals alongside more general cultural and economic processes

Inequality in Key Skills of City Youth Stephen Lamb, Russell W. Rumberger, 2024-01-01 This groundbreaking research volume addresses the topic of educational inequality from a global perspective It includes 16 chapters from an international group of scholars who examine how well city school systems from around the world are preparing young people particularly poor and minority students with the skills they will need for further study work and life overall While skills in key domains such as science math language and civics have been center stage in international comparisons there has been growing recognition of the effects that education has on the development of broader sets of capabilities such as social and emotional skills also known as noncognitive or 21st century skills that can affect the success of students in school and beyond This volume aims to address the shortage of international data on the wide range of skills that students need to learn enabling researchers to compare the types and causes of educational inequality in skills within and between cities

Technologies in Biomedical and Life Sciences Education Harry J. Witchel, Michael W. Lee, 2022-06-24 This contributed volume focuses on understanding the educational strengths and weaknesses of mediated content including media as a learning supplement in comparison to traditional face to face learning Each chapter includes research on and a broad brush summary of approaches to combining life sciences education with educational technologies The chapters are organized into four main sections each of which focuses on a key question regarding the consequences of incorporating media into education In this regard the authors

highlight how educational technology is both a bridge and barrier to student access and inclusivity Further they address the ongoing discussion as to whether students need to be present for lectures and on how having agency in their own learning can improve both retention and conceptual understanding To link the content to current events the authors also shed light on the impact that the COVID 19 pandemic is having on the continuity of educational programs and on the growing importance of educational technologies Consequently the book offers life science educators valuable guidance on the technologies already available and an outlook on what is yet to come

Statistical Aspects of the Microbiological Examination of Foods Basil Jarvis, 2016-07-12 Statistical Aspects of the Microbiological Examination of Foods Third Edition updates some important statistical procedures following intensive collaborative work by many experts in microbiology and statistics and corrects typographic and other errors present in the previous edition Following a brief introduction to the subject basic statistical concepts and procedures are described including both theoretical and actual frequency distributions that are associated with the occurrence of microorganisms in foods This leads into a discussion of the methods for examination of foods and the sources of statistical and practical errors associated with the methods Such errors are important in understanding the principles of measurement uncertainty as applied to microbiological data and the approaches to determination of uncertainty The ways in which the concept of statistical process control developed many years ago to improve commercial manufacturing processes can be applied to microbiological examination in the laboratory This is important in ensuring that laboratory results reflect as precisely as possible the microbiological status of manufactured products through the concept and practice of laboratory accreditation and proficiency testing The use of properly validated standard methods of testing and the verification of in house methods against internationally validated methods is of increasing importance in ensuring that laboratory results are meaningful in relation to development of and compliance with established microbiological criteria for foods The final chapter of the book reviews the uses of such criteria in relation to the development of and compliance with food safety objectives Throughout the book the theoretical concepts are illustrated in worked examples using real data obtained in the examination of foods and in research studies concerned with food safety Includes additional figures and tables together with many worked examples to illustrate the use of specific procedures in the analysis of data obtained in the microbiological examination of foods Offers completely updated chapters and six new chapters Brings the reader up to date and allows easy access to individual topics in one place Corrects typographic and other errors present in the previous edition

Preventing Chemical Weapons Michael Crowley, Malcolm Dando, Lijun Shang, 2018-08-20 The life and chemical sciences are in the midst of a period of rapid and revolutionary transformation that will undoubtedly bring societal benefits but also have potentially malign applications notably in the development of chemical weapons Such concerns are exacerbated by the

unstable international security environment and the changing nature of armed conflict which could fuel a desire by certain States to retain and use existing chemical weapons as well as increase State interest in creating new weapons whilst a broader range of actors may seek to employ diverse toxic chemicals as improvised weapons Stark indications of the multi faceted dangers we face can be seen in the chemical weapons attacks against civilians and combatants in Iraq and Syria and also in more targeted chemical assassination operations in Malaysia and the UK Using a multi disciplinary approach and drawing upon an international group of experts this book analyses current and likely near future advances in relevant science and technology assessing the risks of their misuse The book examines the current capabilities limitations and failures of the existing international arms control and disarmament architecture notably the Chemical Weapons Convention in preventing the development and use of chemical weapons Through the employment of a novel Holistic Arms Control methodology the authors also look beyond the bounds of such treaties to explore the full range of international law international agreements and regulatory mechanisms potentially applicable to weapons employing toxic chemical agents in order to develop recommendations for more effective routes to combat their proliferation and misuse A particular emphasis is given to the roles that chemical and life scientists health professionals and wider informed activist civil society can play in protecting the prohibition against poison and chemical weapons and in working with States to build effective and responsive measures to ensure that the rapid scientific and technological advances are safeguarded from hostile use and are instead employed for the benefit of us all

How College Students Succeed Nicholas A. Bowman, 2023-07-03 Receiving a college education has perhaps never been more important than it is today While its personal societal and overall economic benefits are well documented too many college students fail to complete their postsecondary education As colleges and universities are investing substantial resources into efforts to counter these attrition rates and increase retention they are mostly unaware of the robust literature on student success that is often bounded in disciplinary silos The purpose of this book is to bring together in a single volume the extensive knowledge on college student success It includes seven chapters from authors who each synthesize the literature from their own field of study or perspective Each describes the theories models and concepts they use summarizes the key findings from their research and provides implications for practice policy and or research The disciplinary chapters offer perspectives from higher education public policy behavioral economics social psychology STEM sociology and critical and post structural theory
