**Breeding and using mealworms**

Monika Koeckeritz, 2019-01-16 Mealworms are a cheap and easy way of providing animals with the protein they need. These include birds, fish, reptiles, and some mammals. Two billion people regularly consume insects in Africa, Asia, and South America. The author wants to pass on her own experience for anyone interested in learning more about breeding mealworms. She wrote about what mealworms are and how people can breed their own mealworms for feeding animals and cooking delicious meals. Mealworms make an excellent sustainable alternative to dairy products, chicken, pork, and beef, and have a nutty taste. In this booklet, the author recommends five simple recipes with mealworms. **Growth and Changes in Animals** Jennifer

Lawson, 2001 The 12 lessons in this module introduce students to the characteristics of animal groups, the animal behaviours and habitats, the life cycles of various animals, and their needs for survival. Students also investigate how humans harm and help animals. Also included are materials lists, activity descriptions, questioning techniques, activity centre and extension ideas, assessment suggestions, activity sheets, and visuals. The module offers a detailed introduction to the Hands On Science program, guiding principles, implementation guidelines, an overview of the skills that young students use and develop during scientific inquiry, a list of children's books and websites related to the science topics introduced, and a classroom assessment plan with record keeping templates. **Hands-On Science and Technology for Ontario, Grade 2** Jennifer E.

Lawson, 2023-12-01 Hands On Science and Technology for Ontario Grade 2 is an easy to use resource for teaching the five strands of the Ontario science and technology 2022 curriculum: STEM Skills and Connections, Life Systems, Growth and Changes in Animals, Matter and Energy, Properties of Liquids and Solids, Structures and Mechanisms, Simple Machines, and Movement. Earth and Space Systems, Air and Water in the Environment. Hands On Science and Technology for Ontario Grade 2 encourages students' natural curiosity about science and the world around them as they participate in hands-on activities and explore their environment. Using the inquiry approach, this comprehensive resource fosters students' understanding of STEM, science, technology, engineering, and mathematics skills, makes coding and emerging technologies approachable for both teachers and students, emphasizes personalized learning using a four-part instructional process: activate, action, consolidate, and debrief. It enhances and relates science and technology to sustainability and our changing world, including society, the economy, and the environment. It focuses on practical applications of the engineering design process as students work on solutions to real-life problems, builds understanding of Indigenous knowledge and perspectives specific to Ontario, explores contributions to science and technology by people with diverse lived experiences. Using proven Hands On features, this book provides resources for both teachers and students, including background information on the science topics, complete easy-to-follow lesson plans, materials lists, and digital image banks and reproducibles. Find download instructions in the Appendix of the book. Innovative elements developed specifically for the Ontario curriculum include the following: plugged and unplugged coding activities in nearly every lesson, land-based learning activities, opportunities for students to use the scientific research process, scientific experimentation process, and engineering design process, a fully developed assessment plan to guide
