Chemical Engineering Design Gavin Towler, Ray Sinnott, 2021-07-14 Chemical Engineering Design Principles Practice and Economics of Plant and Process Design is one of the best known and most widely adopted texts available for students of chemical engineering. The text deals with the application of chemical engineering principles to the design of chemical processes and equipment. The third edition retains its hallmark features of scope clarity and practical emphasis while providing the latest US codes and standards including API, ASME and ISA design codes and ANSI standards as well as coverage of the latest aspects of process design, operations, safety, loss prevention, equipment selection and more. The text is designed for chemical and biochemical engineering students, senior undergraduate year plus appropriate for capstone design courses where taken and professionals in industry, chemical process, biochemical, pharmaceutical, petrochemical sectors. Provides students with a text of unmatched relevance for chemical process and plant design courses and for the final year capstone design course. Written by practicing design engineers with extensive undergraduate teaching experience. Contains more than 100 typical industrial design projects drawn from a diverse range of process industries. NEW TO THIS EDITION Includes new content covering food, pharmaceutical and biological processes and commonly used unit operations. Provides updates on plant and equipment costs, regulations and technical standards. Includes limited online access for students to Cost Engineering's Cleopatra Enterprise cost estimating software. *Materials and Technologies for Energy Efficiency* A. Mendez-Vilas, 2015-10-15 *Materials and Technologies for Energy Efficiency* is a compilation of research papers whose main aim is to provide an opportunity to gather knowledge about the latest developments and advances in materials and processes involving energy. This volume consists of a series of works which were presented at The Energy solar energy, fuel cells, energy storage etc. The book is recommended for researchers from a broad range of academic disciplines related to energy and materials. We hope that this set of papers would be useful to stimulate further discussion on energy and materials research.

Robotics for the Ultra-Smart Cyberspace Babulak, Eduard, 2024-06-04 In the rapidly transforming landscape of fast-paced technology evolution, the fusion of artificial intelligence (AI) and humanoid robotics is set to redefine academia as we know it. From advancements in AI, humanoid robotics, nano and bio technologies and smart medicine, the vision of an ultra-smart cyberspace is becoming a tangible reality. Yet amid this transformative potential, scholars face a pressing challenge: how to navigate the complexities of these cutting-edge technologies to drive impactful research and innovation. *Applied AI and Humanoid Robotics for the Ultra-Smart Cyberspace* beckons scholars to harness the full potential of applied AI and humanoid robotics in academia. This book illuminates the most effective applications of these technologies across various disciplines such as industry, business, health, government, military and critical cyber infrastructure. Through rigorously peer-reviewed chapters, the book addresses key issues, provides technical solutions and guides future research directions, fostering a
