**Carb Cycling for Vegans** Tyler Spellmann, 2023-03-24 Dieting is one of the most practiced lifestyles today There are numerous reasons why people opt for a diet either to lose weight improve performance or simply to maintain a healthy body One of the important aspects of dieting involves being aware of the macronutrients in our food These macronutrients are fats cholesterol protein amino acids fiber and carbohydrates Often weight loss diets are geared towards less carb intake and more protein intake Why is that Carbs are mostly found in sweet foods because they are made of sugar or starch When we consume carbs it turns into glucose which is used as the primary source of energy for our body Carbs can be classified as healthy and unhealthy Healthy carbs can be found in fruits and vegetables beans and whole grains which aid in delivering nutrients Unhealthy carbs on the other hand can be found in sodas processed foods and white bread Often these foods cause weight gain and the excessive intake of these carbs may lead to serious diseases like diabetes Research has shown that less carb intake results in natural weight loss It helps in decreasing your appetite and some people feel fuller and more satisfied with less carb intake However eating very little amounts of carbohydrates will not allow your body to function properly due to a lack of sugar Hypoglycemia or low blood sugar may happen Your body will also undergo ketosis or burning fat for energy Therefore eating the right amount of carbs is very important in maintaining a healthy body One way to do this is through carb cycling but the vegan way In this guide we will show you What carb cycling is How carb cycling is done for vegans The advantages and disadvantages of carb cycling for vegans A brief example of a carb cycling plan for vegans Healthy vegan recipes when going through carb cycling
