Frenemies is Ken Auletta s reckoning with an industry under existential assault He enters the rooms of the ad world s most important players meeting the old guard as well as new powers and power brokers investigating their perspectives It s essential reading not simply because of what it reveals about this world but because of the potential consequences the survival of media as we know it depends on the money generated by advertising and marketing revenue that is in peril in the face of technological changes and the fraying trust between the industry s key players

**On the Map** Simon

Garfield,2013-11-05 Examines the pivotal relationship between mapping and civilization demonstrating the unique ways that maps relate and realign history and shares engaging cartography stories and map lore

**International Development**

**Policy** Graduate Institute of International and Development Studies,2012-03-06 International development cooperation is undergoing a revolution The authors question how far bilateral and multilateral aid agencies succeed in mainstreaming

global issues in their operations and assess how emerging and traditional donors address competing objectives often with diverging rationales Cases include Brazil China and South Africa      China - Opportunities for International Media Businesses: Giving Historical Context, Media Import and Export Torsten Hoffmann,2012-03-01 The presence of television is influencing the future of China in ways that no other technology or human agency can J Lull Given its importance both culturally and politically the television industry is one of the most interesting industries in China However a quick review of regulations and market realities showed that there are virtually no foreign channels in the country and probably won't be for a while therefore the focus of this report is foreign television content entering China and to a slightly lesser degree Chinese content in global markets All video genres are discussed here with news and current affairs programming being a special case The first part of this report is a short introduction that includes the history of political influence and a review of existing regulations After this overview the industry and major players namely CCTV Xinhua News Corp Phoenix Disney Discovery Viacom are introduced and analyzed Here the issue of cultural imperialism or Western media influence is elaborated on Then the paper discusses the opportunities for international firms in the Chinese media market and the tension between Government control and market liberalisation A compelling answer to the question of who will dominate the domestic market in ten years is developed Finally the impact of Chinese content on international markets will be assessed within the same timeframe This is particularly interesting as media is not a traditional manufacturing industry and poses different challenges i.e. creative skills      Historic Newspapers in the Digital Age Paul Gooding,2016-12-08 In recent years cultural institutions and commercial providers have created extensive digitised newspaper collections This book asks the timely question what can the large scale digitisation of newspapers tell us about the wider cultural phenomenon of mass digitisation The unique form and materiality of newspapers and their grounding in a particular time and place provide challenges for researchers and digital resource creators alike At the same time the wider context in which digitisation of cultural heritage occurs shapes the impact of digital resources in ways which fall short of the grand ambitions of the wider theoretical discourse Drawing on case studies from leading digitised newspaper collections the book aims to provide a bridge between the theory and practice of how these digitised collections are being used Beginning with an exploration of the hyperbolic nature of technological discourses the author explores how web interfaces funding models and the realities of contemporary user behaviour contrast with the hyperbolic discourse surrounding mass digitisation This book will be of particular interest to those who want to investigate how user studies can inform our understanding of technological phenomena including digital resource creators information professionals students and researchers in universities libraries museums and archives      **The Age of Surveillance Capitalism** Shoshana Zuboff,2019-01-15 The challenges to humanity posed by the digital future the first detailed examination of the unprecedented form of power called surveillance capitalism and the quest by powerful corporations to predict and control our behavior In this masterwork of original thinking and research Shoshana Zuboff

provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new behavioral futures markets where predictions about our behavior are bought and sold and the production of goods and services is subordinated to a new means of behavioral modification. The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a Big Other operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first-century society: a controlled hive of total connection that seduces with promises of total certainty for maximum profit at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future if we let it.

**Beyond the Browser** Karl Bridges, 2012-03-07. Authored by an experienced librarian, digital resource manager, and professor in the field of library science, this book explores the wide-reaching impact of second-generation web technologies on library organization and services and how library staff must respond. Most librarians are infinitely familiar with the Internet due to their daily use of this essential resource. However, having practical expertise with today's digital resources does not guarantee the ability to speak intelligently and convincingly about their less-obvious benefits to funding authorities: an important skill to have. *Beyond the Browser: Web 2.0 and Librarianship* overviews the history of libraries and the Internet to provide necessary perspective and then examines current and future trends in libraries. In Part I, the author traces the notion of connectivity from its roots in the 19th century through the rise of digital technology in the second half of the 20th, concluding with a discussion of its influence on the role, expectations, and performance of today's information professional. Part II investigates the evolutionary impact of open access, scholarly inquiry, and second-generation web technologies on library organization and services. A bibliography of helpful

resources is also included [The Gatekeepers Sergey Brin Larry Page and Google](#) , [The Air Force Law Review](#) ,2017

**The Digital Difference** W. Russell Neuman,2016-06-06 W Russell Neuman examines how the transition from the industrial era media of one way publishing and broadcasting to the two way digital era of online search and social media has affected the dynamics of public life The issues range from propaganda studies and Big Brother to information overload and Internet network neutrality **The Fourth Revolution** John Micklethwait,Adrian Wooldridge,2014 From Washington to Detroit from Brasilia to New Delhi there is a dual crisis of political legitimacy and political effectiveness The Fourth Revolution crystallizes the scope of the crisis and points forward to our future The authors enjoy extraordinary access to influential figures and forces the world over and the book is a global tour of the innovators in how power is to be wielded The age of big government is over the age of smart government has begun Many of the ideas the authors discuss seem outlandish now but the center of gravity is moving quickly This tour drives home a powerful argument that countries success depends overwhelmingly on their ability to reinvent the state And that much of the West and particularly the United States is failing badly in its task China is making rapid progress with government reform at the same time as America is falling badly behind
