Stinger Missile Publications Combined: Manportable Air Defense (MANPAD) Technical And Doctrinal History From 1980 To 2018 U.S. Army, Over 2 800 total pages

INTRODUCTION Today s operational environment presents threats the Army has not faced in nearly 20 years Against peer competitors the joint force may face air parity or even localized enemy air overmatch challenging the assumption of air superiority the joint force has held since the Korean War This will make maneuver forces vulnerable to air attack by fixed and rotary wing aircraft unmanned aircraft systems and cruise missiles Maneuver forces lack capacity and capability to address these threats and the Army requires a speedy response Stinger missiles provide a key capability for maneuver forces to defend themselves from aerial observation and attack However without direct involvement from senior brigade combat team leaders and effective leader training these missiles will become dead weight at best or a fratricide in waiting at worst Units must plan effectively to utilize this capability and ensure it ties directly to their scheme of maneuver as opposed to simply task organizing one
