General software issues	Windows displays a blue screen during startup	• Windows may automatically restart after displaying a blue screen, as shown below. You may also get a Windows startup menu upon reboot. If you do, choose 'Start Windows Normally' and see if the problem goes away. It may be a one-off glitch.
General software issues	Cannot login to Windows	• Ensure you are using your correct DIDE username and password. • Check that Caps Lock/Num Lock isn't on by mistake. • Check that your password is what you are expecting it to be by typing it into the Username box. Ask someone else to logon to your computer to see if they can or not.
