An Invitation to Slow Mark R. McMinn, Lisa Graham McMinn, 2024-10-22 We live in a day of fast information fast fingers fast food fast shipping fast words fast anger and fast judgment Our fight or flight impulses keep us on high alert aided by mobile devices that vibrate each time another crisis strikes All this fastness can easily interfere with a slow intentional life grounded in God's love Christian faith has deep treasures and practices to offer us How will we live and who will we be in this highly charged era where politics economics environment and social norms are under significant duress Come explore quieter more intentional ways of being and how these might attune us to the slow work of God in order that we might love one another and the world as God does Our chapters pair a lure to move fast with an invitation to slow Becoming slow to anger is an invitation to empathy slow to judge is an invitation to humility and slow to grasp is an invitation to contentment Ultimately each of these invitations is a movement toward God

Creating a New Management University Howard Thomas, Alex Wilson, Michelle P. Lee, 2022-07-04 This book provides an in depth exploration of one of the most significant success stories of the development of an entrepreneurial university in recent times as well as its role within society and the economy Written by leading business school Dean and scholar Howard Thomas and Alex Wilson and Michelle Lee the book tracks the genesis of the idea of a third local university in Singapore to its fruition as Singapore Management University SMU It provides important insight and lessons for senior university and business school leaders as

well as regional and national governments The increasing emphasis on the importance of innovative entrepreneurial universities for social and economic growth has prompted this review of the strategy and impact of SMU The book addresses the strategic evolution of SMU itself from its origins as a single business school into a multi school social science focused school of management It examines whether it has fulfilled its promise as an entrepreneurial university and a change agent in the context of Singapore s strong economic growth and educational strategy More broadly it explores how investment in education and entrepreneurial universities such as SMU can facilitate and enhance economic growth University leadership teams policy analysts faculty and students of entrepreneurship education education management and policy in general and business education in particular will find this book an invaluable insight into building a genuinely entrepreneurial university

Agile Data-Oriented Research Tools to Support Smallholder Farm System Transformation James Hammond,Mark Van Wijk,Aniruddha Ghosh,Tim Pagella,Jacob Van Etten,2023-05-09

Smallholder farming systems contribute a substantial quantity of the food consumed in many lower and middle income countries and contribute to the national and local economies Despite the importance of smallholder farming a transformation is needed in order to deliver food security and decent incomes for the farmers themselves and at the national level This transformation must also be sustainable in terms of environmental impacts and social equity in order to be successful in the long term The pressures of population growth climate change and land fragmentation compound the problem Addressing these overlapping issues is a big challenge One obstacle is the lack of good quality granular data linking these issues together Household surveys are the workhorse method for gathering such data but there are well known problems that prevent household survey data from building up a big picture and delivering insights beyond the geographical boundary of each individual study Such obstacles include the lack of access to datasets differences in survey design and respondent biases Agile data oriented research tools can help to overcome these challenges We use the term agile to imply methods that do not attempt exhaustive measurements which are designed to be easy to use and which entail some degree of flexibility in

terms of adaptation to local conditions and integration with other tools or methods. Often these methods also nudge the behavior of tool users towards best practices. In recent years various research tools and approaches have been published which fit within our definition of agile data oriented research tools. The domains these tools function in include monitoring and evaluation, intervention targeting, tailored information delivery, citizen science, credit scoring and user feedback collection, all with the overarching aim to improve data quality and access for those studying the sustainable development of smallholder farming systems. The goal of this Research Topic is to better define that niche, the ecosystem of tools and current practices and to explore how such approaches can provide the underpinning knowledge required for the transformation of smallholder farming systems. One example of an agile data oriented research tool is the Rural Household Multi Indicator Survey (RHoMIS). It is a modular digital system for building household surveys addressing the common topics in smallholder development. It was purposefully designed to give a broad overview of the farm system whilst keeping survey duration to a minimum, to be user friendly in implementation and to be sufficiently flexible to function in a broad variety of locations and projects. Since 2015 it has been used by 30 organizations in 32 countries to interview over 34 000 households. The tool and database are open access and a community of practice is developing around the tool. We particularly welcome contributions that engage with the RHoMIS tool and data. However we also describe the tool in order to provide an example of what is meant by an agile data oriented research tool and welcome contributions focusing on other tools or methodologies. We encourage the submission of manuscripts addressing the above topic and those which fit within one of the following three sub themes:

- i Perspectives or review articles which explore the niche, best practices or promising approaches in agile data oriented research tools for smallholder farm system transformation. Also technology and code articles that describe new tools are welcomed.
- ii Original research articles presenting analyses based on data derived from agile data oriented tools used at the project level. Examples include impact evaluations, adoption studies, targeting studies or adaptive management and should reflect on the additional benefit leveraged by the agile method applied.
- iii Original research articles that make use of the large amounts of data generated by such agile methods and/or link between agile data and other data sources. Examples include meta analyses of data from multiple studies, layering data collected from different agile tools or linking agile data to remote sensing or large scale modeling outputs.
