6. **Discuss the difference between solubility property and a composition property:**
Solubility property shows how well one thing dissolves in another, and is a composition property because it's not changed by the type of solvent.
7. **What's an element? Give an example of an element:**
It is the smallest amount of matter that cannot be broken down by physical means.
8. **How is an element different from a compound? Give an example of a compound:**
An element cannot be broken down, a compound can be broken down into elements without changing them.
9. **What's a mixture?**
A mixture is a combination of substances where the substances do not give up their properties. (Homogeneous mixtures)
10. **How is a homogeneous mixture different from a compound?**
A compound must have the same formula.
11. **How is a heterogeneous mixture different from a compound?**
A compound must have the same formula and the substances must not be broken down but it must react.
12. **How can you tell the difference between a homogeneous mixture and a heterogeneous mixture?**
You can see the individual substances in the heterogeneous mixture and in homogeneous mixtures, you can't see the individual substances.
