promote understanding

**Current Ornithology** Richard Johnston, 2012-12-06 Volume 5 of this series continues its coverage of currently active research fields in ornithology. Because an editor can never be a disinterested observer of his or her own editorial efforts, any claim for superiority of this volume is not without conflict of interest. Even so, Volume 5 has certain merits that even a parent should acknowledge, and I find the current chapters not merely timely and authoritative but compelling in their demand for a reader's attention. Wolfgang and Roswitha Wiltschko provide a perceptive review of magnetic orientation in birds, a piece dedicated to Fritz Merkel, the pioneer in studies of magnetic orientation. Sergei Kharitonov and Douglas Siegel Causey are concerned with the behavioral ecology of seabird coloniality, emphasizing their field experiences in the USSR and the United States. Ted Miller examines the application of studies of bird behavior to comparative biology, pursuing the interface of behavior and evolutionary biology adumbrated by Konrad Lorenz in the 1930s. Jeremy Raynor gives us a summary of the work over the past decade on bird flight, which is not by turns as complex or as simple as we had formerly believed. Carrol Henderson describes recent developments in nongame bird conservation based on his pioneering work in the State of Minnesota. Alan Kamil discusses optimal experimental design for research in ornithology, a field in which experimental work is frequently difficult to pursue.

**Research Techniques in Animal Ecology** Luigi Boitani, T. K. Fuller, 2000 This book provides an analysis of frequently used research techniques in animal ecology, identifying their limitations and misuses as well as possible solutions to avoid such pitfalls. The contributors provide an overarching account of central theoretical and methodological controversies. The editors have forged comprehensive presentations of key topics in animal ecology, such as territory and home range estimates, habitation evaluation, population viability analysis, GIS mapping, and measuring the dynamics of societies.

**Entangled Life** Gillian Barker, Eric Desjardins, Trevor Pearce, 2013-09-05 This volume explores the interactions between organisms and their environments and how this entanglement is a fundamental aspect of all life. It brings together the work and ideas of historians, philosophers, biologists, and social scientists, uniting a range of new perspectives, methods, and frameworks for examining and understanding the ways that organisms and environments interact. The volume is organized into three main sections: historical perspectives, contested models, and emerging frameworks. The first section explores the origins of the modern idea of organism-environment interaction in the mid-nineteenth century and its development by later psychologists and anthropologists. In the second section, a variety of controversial models, from mathematical representations of evolution to model organisms in medical research, are discussed and reframed in light of recent questions about the interplay between organisms and environment. The third section investigates several new ideas that have the potential to reshape key aspects of the biological and social sciences. Populations of organisms evolve in response to changing environments; bodies and minds depend on a wide array of circumstances for their development; cultures create complex relationships with the natural world, even as they alter it irrevocably. The chapters in this volume share a commitment to unraveling the mysteries of this

entangled life      **Calf and Heifer Feeding and management** Zhijun Cao, Michael Van Amburgh, 2020-12-11 From birth to first calving the replacement heifer undergoes tremendous changes anatomically as well as in feeding and management practices The calf changes from being a pseudo monogastric to a full ruminant within a period of two months During the same period the calf is fed colostrum milk or milk replacer and starter with or without hay Notably the lifetime milk production and health of a dairy cow is highly dependent on early life nutrition and management of the calf and subsequently the heifer Hence animal scientists continue to investigate critical areas such as colostrum feeding the level of liquid feeding gut microbial succession energy and protein levels housing health management and their interactions with the animal in an effort to help dairy producers raise successful and sustainable dairy enterprises      The Genius of Dogs Brian Hare, Vanessa Woods, 2013-02-05 The perfect gift for dog lovers and readers of Inside of a Dog by Alexandra Horowitz this New York Times bestseller offers mesmerizing insights into the thoughts and lives of our smartest and most beloved pets Does your dog feel guilt Is she pretending she can't hear you Does she want affection or just your sandwich In their New York Times bestselling book The Genius of Dogs husband and wife team Brian Hare and Vanessa Woods lay out landmark discoveries from the Duke Canine Cognition Center and other research facilities around the world to reveal how your dog thinks and how we humans can have even deeper relationships with our best four legged friends Breakthroughs in cognitive science have proven dogs have a kind of genius for getting along with people that is unique in the animal kingdom This dog genius revolution is transforming how we live and work with dogs of all breeds and what it means for you in your daily life with your canine friend      **Objects and Materials** Penny Harvey, Eleanor Conlin Casella, Gillian Evans, Hannah Knox, Christine McLean, Elizabeth B. Silva, Nicholas Thoburn, Kath Woodward, 2014-07-16 There is broad acceptance across the Humanities and Social Sciences that our deliberations on the social need to take place through attention to practice to object mediated relations to non human agency and to the affective dimensions of human sociality This Companion focuses on the objects and materials found at centre stage and asks what matters about objects Objects and Materials explores the field providing succinct summary accounts of contemporary scholarship along with a wealth of new research investigating the capacity of objects to shape unsettle and exceed expectations Original chapters from over forty international interdisciplinary contributors address an array of objects and materials to ask what the terms of collaborations with objects and materials are and to consider how these collaborations become integral to our understandings of the complex relational dynamics that fashion social worlds Objects and Materials will be of interest to students and scholars across the social sciences and humanities including in sociology social theory science and technology studies history anthropology archaeology gender studies women's studies geography cultural studies politics and international relations and philosophy
