Creative Kids Zone, Grade 1 Brighter Child, 2012-05-01 Creative Kids Zone is the optimal workbook for every 21st century learner. It combines solid standards-based math, language arts, and science content with fun stories, crafts, and games. Children can flip between the five color-coded zones: Craft, Math, Story, Science, and Game to discover a wealth of creative activities that present important content while keeping boredom at bay. Each zone features different activity formats to reinforce essential skills. Craft Zone develops fine motor skills and enhances the creativity and collaboration of a 21st century learner. Math Zone features grade-specific math activities that equip children with the math skills needed for school readiness. Story Zone includes three six-page removable storybooks children can cut out, read, and share while developing early reading and writing skills. Science Zone includes fun hands-on experiments and activities that relate to subject content. Game Zone reinforces critical thinking and logic skills while supporting the lessons taught in the other zones. Each grade-specific Creative Kids Zone workbook features 256 pages of standards-based content combined in a dynamic format with bright illustrations, a colorful character poster, and an additional Answer Zone to help students achieve subject mastery. This winning combination easily provides the fun and engagement that children love with the educationally sound content that parents desire.

Measuring Child Poverty Great Britain: Department for Work and Pensions, 2012-11-15 The Coalition Government is committed to ending child poverty. This consultation document asks how the government can best reflect the reality of child poverty using a multidimensional measure. The most recent child poverty statistics revealed a large reduction in the number of children living below the relative poverty threshold. However, this was largely due to a fall in the median income nationally that pushed the poverty line down. Absolute poverty remained unchanged, and the children who were moved out of poverty were in fact no better off than before. This document considers a number of potential dimensions: income and material deprivation, worklessness, unmanageable debt, poor housing, parental skill level, access to quality education, family stability, and parental health. This consultation seeks views on the specifics of each dimension as well as whether the government should include other dimensions in a multidimensional measure of child poverty along with technical questions about how to build a measure.
