case as it was first assessed by the athletic trainer in order to give readers an opportunity to use their own judgment and decide the best course of action before the original athletic trainer's own response and recommendations are given. Organized by domain, readers will be able to easily find examples of any case they could imagine. Each domain—prevention, evaluation and diagnosis, emergency care, treatment and rehabilitation, and organizational and professional health—has over a dozen scenarios designed to encourage critical thinking. This format gives readers the closest thing to a crash course by exposing them to a diverse array of cases and situations. Athletic training students and clinicians will appreciate the wide range of cases presented in *Athletic Training Case Scenarios: Domain-Based Situations and Solutions*, providing them with the strong knowledge base they will need to respond to any situation they may experience themselves.
