Social Emotions and Their Influences Huiyan Lin,Giorgio Coricelli,Chunliang Feng,Siyang Luo,Steven Young,2023-06-06 The common dimensional model of emotion has emphasized that emotional information is generally processed from two dimensions valence from negative to positive and arousal from low to high Recently several theories have proposed that emotions also vary along a sociality dimension ranging from non social emotions i e basic biological drives to social emotions i e complex social interactions Specifically non social emotions e g fear are derived from incentives or aversive emotions that have direct physiological relevance whereas social emotions e g guilt are elicited within the context of social information processing or social cognition Multiple empirical studies have investigated the processing of non social emotions and the influences of these emotions on other cognitive processes However questions regarding social emotion processes and their influences are still open For example little is known about psychological and neural mechanisms underlying different social emotions processes e g guilt shame love envy and pride the development and individual differences of social emotions or the influences of social emotions on social behaviors and decision making Therefore this Research Topic aims to gain a deeper understanding of how different social emotions are processed among different populations and how these social emotions influence other cognitive processes We aim to have a collection of studies which extend the theoretical technical and

empirical knowledge about psychological and neural mechanisms underlying social emotions processes as well as the influences of these processes on other cognitive processes in particular on social decision making We encourage studies from different domains e g emotion behavioural economics and decision making implemented by different techniques e g behaviour electrophysiology neuroimaging and brain stimulations among different populations e g healthy adults children and elderly persons with psychological traits and personalities and psychiatric patients *Stop Your Emotional Eating* Julie North Schwarz,2012-03 It is a certainty that emotions can make us do what we ought not do Once you start down the path of emotional eating it is hard to turn around and go back the way you came Because breaking the habit of emotional eating is such a hard thing to do we wrote this book to say to you C mon let s do this together **Emotional Freedom from Food** Barrett Williams,ChatGPT,2024-11-21 Unlock a new chapter in your life with Emotional Freedom from Food a transformative guide that delves deep into the intricate relationship between your emotions and your eating habits Are you ready to break the chains of emotional eating and embrace a healthier more balanced lifestyle This eBook is your indispensable companion on this journey to self discovery and empowerment Discover the secret world of emotional eating in Chapter 1 as you explore its triggers and hidden patterns Chapter 2 reveals how emotions influence your food choices and helps you distinguish between emotional hunger and genuine physical hunger Uncover long standing psychological factors in Chapter 3 ranging from childhood experiences to stress responses that could be affecting your eating habits today Move beyond understanding by taking action beginning with the nutritional guidance in Chapter 4 which outlines how your food impacts your mood and brain function Craft personalized strategies in Chapter 5 turning insights into a sustainable plan for real change Embrace mindfulness in Chapter 6 where you learn to stay present and practice mindful eating for long term benefits Venture into the mental realm with Chapter 7 s cognitive behavioral techniques designed to transform negative thoughts and develop healthier coping mechanisms Build emotional resilience in Chapter 8 enhancing your ability to navigate life s challenges and build a supportive environment for change Chapters 9 through 11 focus on self compassion exercise and social support providing comprehensive strategies to foster a compassionate relationship with food discover joy in movement and harness the power of community In Chapter 12 prepare for long term success by celebrating milestones and learning to adapt to life s changes Finally Chapters 13 through 15 guide you in integrating mind body and spirit for holistic health overcoming common challenges and embarking on a journey towards lasting wellness Redefine your relationship with food and redesign your future Start your journey toward emotional freedom today *New Directions in Behavioral Intervention Development for Pediatric Obesity, An Issue of Pediatric Clinics of North America* Sylvie Naar-King,2016-07-06 Almost one out of every three US children is overweight or obese with minority youth at highest risk There are limited efficacious pediatric obesity interventions available for clinicians and successful weight loss trials for minority youth are rare Even fewer interventions have been shown to significantly improve clinical health outcomes such as adiposity blood pressure and cholesterol level and

maintenance of behavior change over the long term remains a challenge Translation I research in which bench findings are applied to the bedside is uncommon in the behavioral arena Thus advances in our understanding of fundamental human processes such as motivation emotion cognition self regulation decision making stress and social networks are not being optimally applied to our most pressing behavioral health problems This issue of Pediatric Clinics will focus on promising behavioral treatments in the pipeline that have been translated from basic behavioral science and are the process of refinement and proof of concept testing
