HL 114, HC 749 - The Next National Security Strategy The Stationery Office, 2015 The last five years have seen a range of international developments ranging from the growth of radicalisation and fundamentalism to growing concerns around our energy supply and rising aggression from Russia The NSS must be flexible enough to support contingency planning and in this Report the Committee recommends that the Government produce a classified NSS or annex which can be used in Government departments to influence planning assumptions for a range of scenarios In its report the Committee said that the next NSS should look hard at the UK's place within the international order and what strategic thinking should underpin its actions over the next five years It also needs to influence the Comprehensive Spending Review to ensure that the Government can make fully informed decisions on security related spending The next

NSS should set clear objectives for the UK's future place in the world and geopolitical priorities and inform the Strategic Defence and Security Review's assessment of the means required to achieve them HL 111 - Make Or Break: The UK's Digital Future The Stationery Office, 2015 This report is a call to action for the incoming Government in May 2015 The world is being transformed by a series of profound technological changes dominated by digital a second machine age This is already having a significant impact on the UK over the next two decades some economists have estimated that 35% of current jobs in the UK could become automated Digital technology is changing all our lives work society and politics It brings with it huge opportunities for the UK but also significant risks This demands an ambitious approach which will secure the UK's position as a digital leader The Committee recommends that the new Government establishes a single and cohesive Digital Agenda The potential value in doing so is significant the Government estimated that the digital sector alone was worth an estimated 105 billion in gross value added to the UK in 2011 A report by the National Institute of Economic and Social Research in 2013 meanwhile found that the size of the digital economy was almost double official estimates Whatever the difficulties in quantifying the value it is clear that digital is already a substantial driver for growth and will become much more so Digital technology is transforming much more than just one sector of the economy the whole economy has become digitised It would therefore be a mistake to take the digital sector as our sole focus of interest Digital technology is pervasive across all aspects of life so much so that the digital economy is becoming synonymous with the national economy The UK cannot afford to miss the opportunity or shirk the challenges this presents Spanish in the USA Roberto

New Work on Speech Acts Daniel Fogal, Daniel W. Harris, Matt Moss, 2018-07-11 Speech act theory is the interdisciplinary study of the wide range of things we do with words. Originally stemming from the influential work of twentieth-century philosophers including J. L. Austin and Paul Grice, recent years have seen a resurgence of work on the topic. On one hand, a new generation of linguists, philosophers, and cognitive scientists have made impressive progress toward reverse-engineering the psychological underpinnings that allow us to do so much with language. Meanwhile, speech act theory has been used to enrich our understanding of pressing social issues that include freedom of speech, racial slurs, and the duplicity of political discourse. This volume presents fourteen new essays by many of the philosophers and linguists who have led this resurgence. The topics span a methodological range that includes formal semantics and pragmatics; foundational issues about the nature of linguistic representation; and work on a variety of forms of indirect and/or uncooperative speech that occupies the intersection of the philosophy of language, ethics, and political philosophy. Several of the contributions demonstrate the benefits of integrating the methodologies and perspectives of these literatures. The essays are framed by a comprehensive introductory survey of the contemporary literature written by the editors.

Boundaries Crossed, at the Interfaces of Morphosyntax, Phonology, Pragmatics and Semantics Huba Bartos, Marcel den Dikken, Zoltán Bánréti, Tamás Váradi, 2018-06-25 This volume offers a selection of interface studies in generative linguistics, a valuable one-stop shopping opportunity for readers interested in the ways in which the various modules of linguistic analysis intersect and interact. The boundaries between the lexicon and morphophonology; between morphology and syntax; between morphosyntax and meaning; and between morphosyntax and phonology are all being crossed in this volume. Though its focus is on theoretical approaches, experimental studies are also included. The empirical focus of many of the contributions is on Hungarian, and several chapters respond to work published by István Kenesei to whom the volume is dedicated.
