### Abstract

English as the global academic language facilitates the international mobility of young researchers (Graddol, D. ,2006). English has been the language of choice for many international scholarly journals. Academic writing is complex, formal, objective, explicit, hedged, and responsible. It is organized and planned precisely and accurately. Glatthorn, A. (1998) says about the academic writing style that the academic writing should strive for clarity, maturity, and formality and should strike a balance between confidence and tentativeness.

### Introduction

In the present scenario, English has become one of the most important academic and professional tools. English is recognized as undoubtedly the most important language to learn for the increasingly mobile international community, and English has become the official language of the business and scientific world (Schütz, 2005). English as the global academic language facilitates the international mobility of young researchers (Graddol, D. ,2006).

In most cases research papers are often rejected due to lack of good writing skills in English language and lack of using appropriate words/vocabulary or sentence structures. English is widely considered and predominantly used for writing academic or scientific research papers /work. English has been the language of choice for many international scholarly journals.

English used in everyday situations or general purpose is quite different from the English used in academic writing. Academic English is purposely used for reading and understanding the study materials, and writing about the subject. It is used to describe an object, situation, a process or how something works and explain something. Writing for academic or scientific research should be lucid, brief, exact and accurate in meaning for the reader's understanding. Generally a simple formal tone and style is used in academic writing, avoiding colloquial, idiomatic, slang, or journalistic expressions in favor of precise vocabulary.
