Mathis, Tina M. Trujillo, 2016-06-01

Over the past twenty years educational policy has been characterized by top down market focused policies combined with a push toward privatization

and school choice The new Every Student Succeeds Act continues along this path though with decision making authority now shifted toward the states These market based reforms have often been touted as the most promising response to the challenges of poverty and educational disenfranchisement But has this approach been successful Has learning improved Have historically low scoring schools turned around or have the reforms had little effect Have these narrow conceptions of schooling harmed the civic and social purposes of education in a democracy This book presents the evidence Drawing on the work of the nation s most prominent researchers the book explores the major elements of these reforms as well as the social political and educational contexts in which they take place It examines the evidence supporting the most common school improvement strategies school choice reconstitutions or massive personnel changes and school closures From there it presents the research findings cutting across these strategies by addressing the evidence on test score trends teacher evaluation miracle schools the Common Core State Standards school choice the newly emerging school improvement industry and re segregation among others The weight of the evidence indisputably shows little success and no promise for these reforms Thus the authors counsel strongly against continuing these failed policies The book concludes with a review of more promising avenues for educational reform including the necessity of broader societal investments for combatting poverty and adverse social conditions While schools cannot single handedly overcome societal inequalities important work can take place within the public school system with evidence based interventions such as early childhood education detracking adequate funding and full service community schools all intended to renew our nation s commitment to democracy and equal educational opportunity

often thought of as a natural process something instinctive that we refine by watching our own mothers and others in our community We rarely think of motherhood as something that is time and culturally specific yet like culture itself it is socially constructed and both motherhood and childhood evolve over time With the rise in educational attainment of mothers in the American population the expectations associated with childhood increasingly include not just education but cognitive development and extracurricular activities as the partnership between parents and education intensifies in the joint project of human development of children Motherhood Childhood and Parenting in an Age of Education offers a new way to conceptualize the high demands of contemporary parenthood It traces the emerging narrative about the good mother changes in the underlying assumptions of what constitutes the good mother and the implications for the good childhood as education grows in institutional strength This book demonstrates that education is driving the formation of the parent and child roles in the dominant contemporary culture of the US although alternate models exist Education itself has expanded over time to become our largest social intervention defining behaviors and beliefs such as parental involvement in schooling the unengaged parent and the deficient student
