Sadeghi,Dan Douglas,2023-04-27 Fundamental Considerations in Technology Mediated Language Assessment aims to address issues such as how the forced integration of technology into second language assessment has shaped our understanding of key traditional concepts like validity reliability washback authenticity ethics fairness test security and more Although computer assisted language testing has been around for more than two decades in the context of high stakes proficiency testing much of language testing worldwide has shifted to at home mode and relies heavily on the mediation of digital technology making its widespread application in classroom settings in response to the COVID 19 outbreak unprecedented Integration of technology into language assessment has brought with it countless affordances and at the same

time challenges both theoretically and practically One major theoretical consideration requiring attention is the way technology has contributed to a reconceptualization of major assessment concepts constructs There is very limited literature available on the theoretical underpinnings of technology mediated language assessment This book aims to fill this gap This book will appeal to academic specialists practitioners or professionals in the field of language assessment advanced and or graduate students and a range of scholars or professionals in disciplines like educational technology applied linguistics and teaching English to speakers of other languages TESOL

Law, Ecology, and the Management of Complex Systems

Tiina Paloniitty, 2022-08-19 This book addresses the role of law in the adaptive management of socio ecological systems Recent years have witnessed a rise in discussion over the relation between adaptivity and law as if after decades of insouciance legal scholars have finally started to understand the impacts of the scientific paradigm called adaptive management on the legal sphere Even though the complicated relations between law and the adaptive management of socio ecological systems have become more debated a thorough examination of the scientific and theoretical fundamentals of such endeavours has yet to be presented Using the illustrative example of European Union water governance and its path toward embracing adaptive management this book emphasises the legal significance of properly understanding the manner in which scientific knowledge of the environment is produced Though always pivotal rigorously apprehending science is especially crucial when dealing with the management of complex ecosystems as the normative is created gradually before law begins to examine the facts of the matter After examining the roots of adaptive management this book argues that the legal needs to understand itself as an integral part of the process of the socio ecological management of complex systems and not merely an external umpire resolving disputes As a whole the book offers new insights into the EU regulator s approaches to scientific realities making it an interesting read not only to academics and legal scholars but also to regulators striving to deepen their understanding or pondering which approach to adopt in the face of new regulatory challenges and to scientists interested in the science and law aspects of their work

Materializing the Middle Passage Jane Webster, 2023-10-31 An estimated 2.7 million Africans made an enforced crossing of the Atlantic on British slave ships between c 1680 and 1807 a journey that has become known as the Middle Passage This book focuses on the slave ship itself The slave ship is the largest artefact of the Transatlantic slave trade but because so few examples of wrecked slaving vessels have been located at sea it is rarely studied by archaeologists Materializing the Middle Passage A Historical Archaeology of British Slave Shipping 1680-1807 argues that there are other ways for archaeologists to materialize the slave ship It employs a pioneering interdisciplinary methodology combining primary documentary sources maritime and terrestrial archaeology paintings maritime and ethnographic museum collections and many other sources to rebuild British slaving vessels and to identify changes to them over time The book then goes on to consider the reception of the slave ship and its trade goods in coastal West Africa and details the range and uses of the many African resources including ivory gold and live animals entering

Britain on returning slave ships The third section of the book focuses on the Middle Passage experiences of both captives and crews and argues that greater attention needs to be paid to the coping mechanisms through which Africans survived yet also challenged their captive passage Finally Jane Webster asks why the African Middle Passage experience remains so elusive even after decades of scholarship dedicated to uncovering it She considers when how and why the crossing was remembered by saltwater captives in the Caribbean and North America The marriage of words and things attempted in this richly illustrated book is underpinned throughout by a theoretical perspective combining creolization and postcolonial theory and by a central focus on the materiality of the slave ship and its regimes
