Santhiram, Education in multiethnic societies is a subject of considerable debates in almost all parts of the world These debates have invoked strongly felt positions between competing ethnic groups over a host of issues that have a profound impact on the nation building process Apart from deep seated issues arising from contrasting internal demands over educational rights and equality emerging issues arising from external influences such as the global spread of English as a result of globalisation have also impacted the nation building process of multiethnic societies It is against this context that educational issues in multiethnic societies merit our attention In the case of Malaysia discourses over these issues are particularly intense and hotly contested by the different ethnic groups This is primarily because of the extreme difficulties in mediating these complicated issues which are impinged by competing socio cultural economic and political interests This book explores the contested terrains of education in multiethnic Malaysia It comprises seven chapters that cover three crucial areas of educational provisions and delivery namely education of ethnic minorities education and national integration and educational language policy These three crucial areas are often the prime concerns of policy makers in multiethnic societies who have to tread a thin line in resolving these issues which are underpinned by intense coterminous interests and inter ethnic competition and having the potential to generate conflicts contestation and power struggle As far as the Malaysian policy makers are concerned their efforts in resolving these issues have not been overly successful It is most unfortunate that their policy decisions are at times influenced by competing political and ethnic interests rather than guided by sound theoretical underpinnings that could put the educational development of the country on a stronger platform and a clearer trajectory **Taylor's 7th Teaching and Learning Conference 2014 Proceedings** Siew Fun Tang,Loshinikarasi Logonnathan,2015-06-01 These conference proceedings showcase a rich and practical exchange of approaches and vital evidence based practices taking place around the world They clarify the complex challenges involved in bringing about a holistic educational environment in schools and institutes of higher learning that fosters greater understanding and offer valuable insights on how to avoid the pitfalls that come with rolling out holistic approaches to education To do so the proceedings focus on the subthemes Support and Development Mobility and Diversity and Networking and Collaboration in Holistic Education **Malaysia Knowledge Based Economy Master Plans and Programs Handbook - Strategic Information and Programs** IBP, Inc.,2014-10-26 2011 Updated Reprint Updated Annually Malaysia Knowledge Based Economy Master Plan Handbook Insights from Emergent Education Systems in Selected Countries Jose A.
