Zei, MD, PhD,2019-05-01 Catheter ablation has become a widely used approach to treating various cardiac arrhythmias Traditionally catheter ablation procedures are guided by fluoroscopic imaging to help understand catheter position during mapping The potentially significant exposure to radiation to the patient physician and staff increases risks of radiation exposure related disease Also the protective lead garments worn increases risks of orthopedic injury Current advanced electroanatomic mapping and intracardiac echocardiography technology have allowed the development of endocardial catheter ablation techniques without the use of fluoroscopy safely and effectively A host of expert and

experienced authors present a practical overview of the rationale and methodology for a low or zero fluoro environment in the electrophysiology lab with the critical goal of significantly reducing radiation exposure to the patient physician and staff This practical guide Covers the entire spectrum of commonly and less commonly performed ablation procedures via endocardial approach Discusses general principles that are applicable across ICE and EAM platforms Will assist the electrophysiologist and their team to safely and effectively work toward the significant reduction in fluoroscopy utilization while also likely improving procedural safety i e fewer complications after the adoption of these techniques Includes a library of 50 videos with 9 extended films 108 minutes by Dr Razminia detailing step by step procedures and techniques     *Atrial Fibrillation - Current Management and Practice* ,2025-06-25 This book offers a thorough internationally informed guide to atrial fibrillation AF treatment accessible to a wide range of clinicians from primary care physicians to cardiologists It covers AF risks including stroke and heart failure clinical pathways anesthesia considerations and surgical and catheter ablation techniques It also explores recurrence factors and exercise moving beyond guidelines to provide practical real world insights into comprehensive AF management     **Atrial Fibrillation: Technology for Diagnosis, Monitoring, and Treatment**
