Elite Education International Perspectives is the first book to systematically examine elite education in different parts of the world. Authors provide a historical analysis of the emergence of national elite education systems and consider how recent policy and economic developments are changing the configuration of elite trajectories and the social groups benefiting from these. Through country level case studies this book offers readers an in depth account of elite education systems in the Anglophone world in Europe and in the emerging financial centres of Africa, Asia and Latin America. A series of commentaries highlight commonalities and differences between elite education systems and offer insights into broader theoretical issues with which educationalists, researchers and policy makers are engaging. With authors including Stephen J Ball, Donald Broady, Rub n Gaztambide, Fern ndez Heinz, Hermann Kr ger, Maria Alice Nogueira, Julia Resnik and Agn s van Zanten, the book offers a benchmark perspective on issues frequently glossed over in comparative education, including the processes by which powerful groups retain privilege and elite status in rapidly changing societies. Elite Education International Perspectives will appeal to policy makers and academics in the fields of education and sociology. Simultaneously it will be of special relevance to post graduates enrolled on courses in the sociology of education, education policy and education and international development.

Apprenticeship in Critical Ethnographic Practice Jean Lave, 2011-04-15

In this extended meditation Jean Lave interweaves analysis of the process of apprenticeship among the Vai and Gola tailors of Liberia with reflections on the evolution of her research on those tailors in the late 1970s. In so doing she provides both a detailed account of her apprenticeship in the art of sustained fieldwork and an insightful overview of thirty years of changes in the empirical and theoretical facets of ethnographic practice. Examining the issues she confronted in her own work, Lave shows how the critical questions raised by ethnographic research erode conventional assumptions, altering the direction of the work that follows. As ethnography takes on increasing significance to an ever widening field of thinkers on topics from education to ecology, this erudite but accessible book will be essential to anyone tackling the question of what it means to undertake critical and conceptually challenging fieldwork. Apprenticeship in Critical Ethnographic Practice explains how to seriously explore what it means to be human in a complex world and why it is so important.
