A BRAND New You Austin E. Thompson, Jr., MBA, MPM,2010-02-19 I took personal pride in composing this book on personal branding with a purpose of reaching entrepreneurs who are interested in enhancing their personal self image in parallel with the image of their businesses for working professionals who are on the fast track up the corporate ladder and may wish to gain an edge on the competition and for college students who are preparing for a professional life after their academic journey Personal branding is not new but has become increasingly important for many professionals in recent years who seek a competitive advantage over their counterparts to stand out and be noticed among a plethora of talented candidates This is even more imperative now than a few years ago as we are faced with 10% national unemployment with over 7 million workers laid off since the recession began back in December 2007 In some U S cities unemployment is over 50% with the unemployment rate in some states exceeding the national rate With so many professionals out of work fighting to get re employed in a job and career commensurate with their skills and education the task has become increasingly challenging leaving many unemployed individuals hopeless while confronted with life changing decisions Trying to stand out and be recognized in a dense pool of qualified candidates is not as easy as it may have been in the past with companies directing millions of candidates to their websites on which to post resumes and create lengthy and time intensive profiles The job search has become a faceless and mundane process with very little success and with increased frustration to many who continue to sink into an abyss of debt and personal despair With this situation looming those out of work professionals will

have to think outside the box on how to get noticed be recognized and make a positive impression on recruiters and hiring managers constantly searching for suitable talent Candidates will have to market and promote themselves as a BRAND a successful personal image that translates quality success integrity impressiveness reliability and bringing value to the company of their interest Personal branding will ensure that companies identify you with the strength and true worth in what they look for when considering candidates For those who are fortunate to still be employed personal branding is just as important to achieving success in the work place Companies are constantly looking for ways to trim the fat and become lean in their operations Hence operational efficiency is their ultimate goal Akin to this effort of process improvement is doing more with less which often influences the elimination of human labor This occurs when companies experience a reduction in profits have less retained earnings to expand operations and invest in growing the business and realizing diminishing returned value to their shareholders Oftentimes workers must be let go if they are determined to be part of non producing or non revenue generating functions of the organization or if they themselves are perceived to be adding little value to the organization If a company believes it can do without you it will let you go in a layoff or downsizing It is not a personal matter but a business decision that companies large or small are confronted with on a constant basis It is all about the bottom line and keeping the doors open Working professionals have to determine how they are identified by their companies How strong is your personal BRAND and how valuable are you to your employer What differentiates you from your peers that make you stand out What type of impression are you making on your company Are there any weaknesses that you have to strengthen These are some of the questions that you must honestly ask yourself and answer Performing an honest assessment on your personal BRAND will capture the things that make you valuable to your employer while at the Make it Happen Tony Anthony White,2013-05-22 Team Leaders facilitators managers and anyone that leads teams will appreciate the ease in which this book is organized and written Checklists tables and illustrations are interwoven with Tony s practical experiences and observations making this book extremely relevant to the dynamics of team leadership in 2011 Sales Force Design For Strategic Advantage A. The Three C's: Communication, Customer Service, & Chatbots I. Edmondson, 2024-01-05 The world that our forefathers knew no longer exists and the world in which most of us grew up is no longer here either Science has taken us into a new world in which humans and their activities are now augmented by robots that can perform many of the functions that were previously believed to be only possible for humans to perform The total impact of these changes is as yet unknown but we do know that every facet of human existence has been and will continue to be impacted There are many who fear for the future of mankind while others see possibilities for changes that will improve all facets of our lives The one thing we do know life will never be the same again

The Virtual Public Servant Stephen Jeffares, 2020-11-30

With recent advances and investment in artificial intelligence are we on the verge of introducing virtual public servants Governments around the world are rapidly deploying robots and virtual agents in healthcare education local government social care and criminal justice These advances not only promise unprecedented levels of control and convenience at a reduced cost but also claim to connect to empathise and to build trust This book documents how after decades of designing out costly face to face transactions investment in call centres and incentivising citizens to self service the tech industry is promising to re humanise our frontline public services It breaks out of disciplinary silos and moves us on from the polarised hype vs fear discussion on the future of work It does so through in depth Q methodology interviews with a wide range of frontline public servants from doctors to librarians from social workers to school receptionists and from police officers to call handlers The first of its kind this book should be of interest across the social sciences and to anyone concerned with how recent measures to digitise and automate our services are paving the way for the development of full blown AI in frontline work
