Digital Media and Democratic Futures Michael

X. Delli Carpini, 2019-02-14 The revolution in digital communications has altered the relationship between citizens and political elites with important implications for democracy As new information ecosystems have evolved as unforeseen examples of their positive and negative consequences have emerged and as theorizing data and research methods have expanded and improved the central question has shifted from if the digital information environment is good or bad for democratic politics to how and in what contexts particular attributes of this environment are having an influence It is only through the careful analysis of specific cases that we can begin to build a more comprehensive and nuanced understanding of the role of digital media in democratic theory and practice The essays in Digital Media and Democratic Futures focus on a variety of information and communication technologies politically relevant actors substantive issues and digital political practices doing so from distinct theoretical perspectives and methodological approaches Individually each of these case studies provides deep insights into the complex and context dependent relationship between media and democracy Collectively they show that there is no single outcome for democracy in the digital age only a range of possible futures Contributors Rena Bivens Michael X Delli Carpini Jennifer Earl Thomas Elliott Deen Freelon Kelly Gates Philip N Howard Daniel Kreiss Ting Luo Helen Nissenbaum Beth Simone Noveck Jennifer Pan Lisa Poggiali Daniela Stockmann
