

FAFSA[®]

FREE APPLICATION *for* FEDERAL STUDENT AID

Use this form to apply free for federal and state student grants, work-study and loans.

Or apply free online at www.fafsa.gov.

Applying by the Deadlines

For federal aid, submit your application as early as possible, but no earlier than January 1, 2014. We must receive your application no later than June 30, 2015. Your college must have your correct, complete information by your last day of enrollment in the 2014-2015 school year.

For state or college aid, the deadline may be as early as January 2014. See the table to the right for state deadlines. You may also need to complete additional forms.

Check with your high school guidance counselor or a financial aid administrator at your college about state and college sources of student aid and deadlines.

If you are filing close to one of these deadlines, we recommend you file online at www.fafsa.gov. This is the fastest and easiest way to apply for aid.

Using Your Tax Return

We recommend that you complete and submit your FAFSA as soon as possible on or after January 1, 2014. If you (or your parents) need to file a 2013 income tax return with the Internal Revenue Service (IRS), and have not done so yet, you can submit your FAFSA now using estimated tax information, and then you **must correct** that information **after you file** your return.

The easiest way to complete or correct your FAFSA with accurate tax information is by using the IRS Data Retrieval Tool through www.fafsa.gov. In a few simple steps, most students and parents who filed a 2013 tax return can view and transfer their tax return information directly into their FAFSA.

Summer Melt Benjamin L. Castleman, Lindsay C. Page, 2020-01-15 Under increasing pressure to raise graduation rates and ensure that students leave high school college and career ready many school and district leaders may believe that when students graduate with college acceptances in hand their work is done But as Benjamin L. Castleman and Lindsay C. Page show summer can be a time of significant attrition among college intending seniors especially those from low income families Anywhere from 10 to 40 percent of students presumed to be headed to college fail to matriculate at any postsecondary institution in the fall following high school *Summer Melt* explores the complex factors that contribute to this trend the absence of school support confusion over paperwork lack of parental guidance and the teenage tendency to procrastinate The authors draw on findings from fields such as neuroscience behavioral economics and social psychology to contextualize these factors Drawing on a series of research studies they show how schools and districts can develop effective low cost scalable responses including counselor outreach peer mentoring and using text messages and social media to help students stay on track over the summer *Summer Melt* offers very practical guidance for schools and districts committed to helping their students make the transition to college

Making Education Work for the Poor William Elliott, Melinda Lewis, 2018-07-03 Making Education Work for the Poor identifies wealth inequality as the gravest threat to the endangered American Dream Though studies have clearly illustrated that education is the primary path to upward mobility today educational outcomes are more directly determined by wealth than innate ability and exerted effort This accounting directly contradicts Americans understanding of the promise the American Dream is supposed to offer a level playing field and a path towards a more profitable future In this book the authors share their own stories of their journeys through the unequal U S education system One started from relative privilege and had her way to prosperity paved and her individual efforts augmented by institutional and structural support The other grew up in poverty and had to fight against currents to complete higher education only to find his ability to profit from that degree compromised by student debt To directly counter wealth inequality and make education the great equalizer that Americans believe it to be this book calls for a revolution in financial aid policy from debt dependence to asset empowerment The book examines the evidence base supporting Children's Savings Accounts including CSAs demonstrated potential to improve children's outcomes all along the opportunity pipeline early education school achievement college access and completion and post college financial health It then outlines a policy that builds on CSAs to incorporate a sizable progressive wealth transfer This new policy Opportunity Investment Accounts is framed as the cornerstone of the wealth building agenda the nation needs in order to salvage the American Dream Written by leading CSA researchers the book includes overviews of the major children's savings legislation proposed in Congress and the key features of prominent CSA programs in operation around the country today as well as new qualitative and quantitative CSA research The book ultimately presents a critical development of the theories that together explain how universal progressive asset based education financing could make education work equitably for all American children

Behavioral Science & Policy: Volume 3, Issue 1 Craig R. Fox, Sim B. Sitkin, 2017-12-26 The success of nearly all public and private sector policies hinges on the behavior of individuals groups and organizations Today such behaviors are better understood than ever thanks to a growing body of practical behavioral science research However policymakers often are

unaware of behavioral science findings that may help them craft and execute more effective and efficient policies The pages of this new journal will become a meeting ground a place where scientists and non scientists can encounter clearly described behavioral research that can be put into action By design the scope of Behavioral Science Policy is broad with topics spanning health care financial decisionmaking energy and the environment education and culture justice and ethics and work place practices Contributions will be made by researchers with expertise in psychology sociology law behavioral economics organization science decision science and marketing The journal is a key offering of the Behavioral Science Policy Association in partnership with the Brookings Institution The mission of BSPA is to foster dialog between social scientists policymakers and other practitioners in order to promote the application of rigorous empirical behavioral science in ways that serve the public interest BSPA does not advance a particular agenda or political perspective *Promise Nation* Michelle Miller-Adams,2015-10-27 Michelle Miller Adams presents the most accessible and comprehensive overview available of the emergence and development of the Promise movement nationwide as well as an up to date assessment of available research on the impacts of such programs **Randomistas** Andrew Leigh,2018-07-24 A fascinating account of how radical researchers have used experiments to overturn conventional wisdom and shaped life as we know it Experiments have consistently been used in the hard sciences but in recent decades social scientists have adopted the practice Randomized trials have been used to design policies to increase educational attainment lower crime rates elevate employment rates and improve living standards among the poor This book tells the stories of radical researchers who have used experiments to overturn conventional wisdom From finding the cure for scurvy to discovering what policies really improve literacy rates Leigh shows how randomistas have shaped life as we know it Written in a Gladwell esque style this book provides a fascinating account of key randomized control trial studies from across the globe and the challenges that randomistas have faced in getting their studies accepted and their findings implemented In telling these stories Leigh draws out key lessons learned and shows the most effective way to conduct these trials **Making College Work** Harry J. Holzer,Sandy Baum,2017-08-15 Practical solutions for improving higher education opportunities for disadvantaged students Too many disadvantaged college students in America do not complete their coursework or receive any college credential while others earn degrees or certificates with little labor market value Large numbers of these students also struggle to pay for college and some incur debts that they have difficulty repaying The authors provide a new review of the causes of these problems and offer promising policy solutions The circumstances affecting disadvantaged students stem both from issues on the individual side such as weak academic preparation and financial pressures and from institutional failures Low income students disproportionately attend schools that are underfunded and have weak performance incentives contributing to unsatisfactory outcomes for many students Some solutions including better financial aid or academic supports target individual students Other solutions such as stronger linkages between coursework and the labor market and more structured

paths through the curriculum are aimed at institutional reforms All students and particularly those from disadvantaged backgrounds also need better and varied pathways both to college and directly to the job market beginning in high school We can improve college outcomes but must also acknowledge that we must make hard choices and face difficult tradeoffs in the process While no single policy is guaranteed to greatly improve college and career outcomes implementing a number of evidence based policies and programs together has the potential to improve these outcomes substantially **Higher**

Education Student Financial Aid Kazi Abdur Rouf,2020-03-25 The research finds the majority of the higher education student financial aid programs are managed by the states or private agencies or foundations in the world Their financial aid policies are continuously changing and improving to adopt contemporary situations and changing time Likewise the GB higher education student loan policy improvement can be done by continuously reviewing the system which is necessary for GB to strengthen its higher education student loan program in Bangladesh **Interrupting Class Inequality in Higher**

Education Laura M. Harrison,Monica Hatfield Price,2017-02-24 Interrupting Class Inequality in Higher Education explores why socioeconomic inequality persists in higher education despite widespread knowledge of the problem Through a critical analysis of the current leadership practices and policy narratives that perpetuate socioeconomic inequality this book outlines the trends that negatively impact low and middle income students and offers effective tools for creating a more equitable future for higher education By taking a solution focused approach this book will help higher education students leaders and policy makers move from despair and inertia to hope and action **The Road Ahead for America's Colleges and**

Universities Robert B. Archibald,David Henry Feldman,2017 Archibald and Feldman leading observers of the scene provide an incisive overview of the challenges facing and possibilities for America s universities and colleges in their training future generations **The 160-Character Solution** Benjamin L. Castleman,2015-11-15 A fascinating study that brings the power

of behavioral economics to how schools work how students learn and how we can help them succeed For decades schools have invested substantial resources in boosting educational outcomes for disadvantaged students but those investments have not always generated positive outcomes Although many communities have expanded school choice for example families often choose to keep their children in failing schools And while the federal government has increased the size of Pell Grants many college bound students who would be eligible for aid never apply Then there is the troubling trend of summer melt in which up to 40 percent of high school graduates who have been accepted to college mostly from underserved communities fail to show up for the fall semester In The 160 Character Solution Benjamin L Castleman shows how insights from behavioral economics the study of how social cognitive and emotional factors affect our decisions can be leveraged to help students complete assignments perform to their full potential on tests and choose schools and colleges where they are well positioned for success By employing behavioral strategies or nudges Castleman shows administrators teachers and parents can dramatically improve educational outcomes from preschool to college Castleman applies the science of decision making to

explain why inequalities persist at various stages in education and to identify innovative solutions to improve students academic achievement and attainment By focusing on behavioral changes Castleman demonstrates that small changes in how we ask questions design applications and tailor reminders can have remarkable impacts on student and school success
