Racism in America Harvard University Press, 2020-08-06 Racism in America has been the subject of serious scholarship for decades

At Harvard University Press we've had the honor of publishing some of the most influential books on the subject. The excerpts in this volume culled from works of history, law, sociology, medicine, economics, critical theory, philosophy, art, and literature are an invitation to understand anti-Black racism through the eyes of our most incisive commentators. Readers will find such classic selections as Toni Morrison's description of the Africanist presence in the White American literary imagination, Walter Johnson's depiction of the nation's largest slave market, and Stuart Hall's theorization of the relationship between race and nationhood. More recent voices include Khalil Gibran Muhammad on the pernicious myth of Black criminality, Elizabeth Hinton on the link between mass incarceration and 1960s social welfare programs, Anthony Abraham Jack on how elite institutions continue to fail first-generation college students, Mehrsa Baradaran on the racial wealth gap, Nicole Fleetwood on carceral art, and Joshua Bennett on the anti-Black bias implicit in how we talk about animals and the environment. Because the experiences of non-White people are integral to the history of racism and often bound up in the story of Black Americans, we have included writers who focus on the struggles of Native Americans, Latinos, and Asians as well. Racism in America is for all curious readers, teachers, and students who wish to discover for themselves the complex and rewarding intellectual work that has sustained our national conversation on race and will continue to guide us in future years. Richard K. Vedder, 2019-05-01

Higher education in America is in crisis. Costs are too high, learning is too little, and the payoff to students and society is increasingly problematic. In *Restoring the Promise*, Richard Vedder shows how the precarious position of colleges and universities results from a mostly unsuccessful expansion of governmental involvement in the academy, especially at the federal level. The book examines today's most serious issues in higher education, including free speech and academic freedom, tuition and other costs, culture and curricula, governance, gender, race, and diversity, due process, admissions, student loans, and much more. It diagnoses problems and identifies solutions. For example, the total cost of college per student in the United States is now higher than in any other country. When combining the monetary costs of college with the opportunity costs of losing years of labor to the economy, the true cost of higher education to American society well exceeds one trillion dollars annually. Yet despite American higher education's immense price tag, students are learning less than ever before and continue to be underemployed. The book discusses the three I's of university reform: information, incentives, and innovation. Without information, it is impossible for taxpayers and governing authorities to ensure that public education spending truly furthers the broader interests of society rather than the narrow interests of faculty and administrators. Shaping incentives for management would help to reduce costs and improve quality. Business practices such as Responsibility-Centered Management (RCM), for example, allow profit to motivate efficiency and encourage learning outcomes. And expanding the use of innovation in technology and open online courses, along with relinquishing old rules such as tenure and three-month summer vacations, offer new hope for institutions of higher education. The book discusses such additional reforms as the following: Ending or revising the federal student financial aid program; Giving departments or even

professors a share of overall revenue based on student enrollments in their classes Departments or professors would then be required to pay their share of travel building rental maintenance utilities and other such costs from the revenues they receive Providing earnings data on former students by college five ten or fifteen years after matriculation Prospective students and parents as well as lawmakers and oversight officials would be assisted regarding school successes and failures Increasing faculty teaching loads Instituting three year degrees and year round instruction Ending discrimination against for profit schools Ending grade inflation Ending speech codes and other barriers to academic freedom Ending affirmative action and related diversity programs And more **The Insider's Guide to the Colleges, 2015** Yale Daily News,Yale Daily News Staff,2014-07 Students on campus tell you what you really want to know Cover **Complete Book of Colleges, 2005 Edition** Princeton Review (Firm),2004-07-20 Up to date information on 1 780 colleges and universities
