

Offering a broad variety of presentation modes with fast and simple operation

Photo: FCV-292

MARKER ZOOM

Zoom
Markers

The portion of water column to be enlarged can be freely set by the zoom markers. The zoomed picture appears on the left half of the screen.

BOTTOM ZOOM

Zoom
Markers

The zoom markers follow the bottom contour automatically giving us an expanded view of the area near the bottom. This is done even under conditions of changing depth.

BOTTOM-LOCK

The bottom is displayed as a straight line on the lower part of the screen, regardless of bottom contour. This mode is useful for detection of fish close to or on the bottom.

The FURUNO FCV-291 (single frequency) and FCV-292 (dual frequency) are compact, cost-effective color video sounders (1, 2 or 3 kW model selectable) for professional fishermen. The operating frequency can be selected from 28, 38*, 50, 88 or 200 kHz (two frequencies selectable for FCV-292).

They feature a variety of display modes, user-friendly operation and easy evaluation of seabed conditions. The echoes are presented on the 10-inch screen in up to 16 colors. One of the 16 colors can be displayed in white to emphasize the specific echo level.

Display modes include: Single (Low-frequency/Hi-frequency selectable for FCV-291), Dual (FCV-292), Marker Zoom, Bottom-Lock, Bottom Discrimination, Bottom Zoom, NAV data and A-scope. The Bottom Discrimination mode enhances the bottom echo tails to easily discriminate between soft, rocky or sandy bottom. This is done by noting the different colors and lengths of bottom tails. In the Nav data display, own ship navigation data can be displayed using appropriate sensors.

*A 38 kHz model is available for the FCV-291 only. (The transducer should be supplied locally)
