Unit 3.1.1

**Summary**

The film Gattaca is set in a future where genetic engineering is used to create "perfect" humans. Vincent, a man with a "flawed" genome, is born to a family that has opted for genetic engineering. His parents, who are both "perfect" humans, decide to have another child because they want a child who is "perfect" like them. Vincent's brother, Julian, is the "perfect" child. Vincent, on the other hand, has a genome that is 1% flawed. This means he has a 1% chance of developing a genetic defect that could shorten his life. Despite this, Vincent is a brilliant student and athlete. He is determined to become an astronaut and travel to space. However, the Gattaca Company, which is responsible for genetic testing, has discovered Vincent's genome. They refuse to let him travel to space because of his "flawed" genome. Vincent is determined to prove to them that he is capable of more than his genome allows. He uses a variety of methods to bypass the Gattaca Company's security, including using Julian's DNA to gain access to the space shuttle. In the end, Vincent successfully travels to space and proves to the Gattaca Company that he is capable of more than his genome allows.
