The Flight of Icarus Yiannis Drossos, 2020-12-10. This book provides a detailed analysis of the institutional transformations brought about by the financial crisis, focusing on the institution-building course of Europe and the Constitution-bending course in several Member States. It discusses the seemingly contradictory interplay between national and European institutions and the law resulting from the crisis, arguing that the anti-crisis exceptionality constitutes the matrix of the new normality of the reformed European economic governance. The author carries out a critical analysis of the new economic governance and its case law with regular reference to relevant political episodes, key economic figures, and to the hitherto lax modes and rules. The author also offers deep insights into the Greek adjustment programme and the crisis-related Greek and Portuguese constitutional case law presented in comparison with the German and French case law. The book concludes with a critical overview of the profound mutations in the role of national Constitutions instigated by the new European economic governance and the emergence of a democratically deficient meta-constitutional mode of functioning of both the European institutions and national Constitutions.

Bureaucracy, Work and Violence Alexander Nützenadel, 2020-05-01. Work played a central role in Nazi ideology and propaganda, and even today there remain some who still emphasize the supposedly positive aspects of the regime's labor policies, ignoring the horrific and inhumane conditions they produced. This definitive volume provides for the first time a systematic study of the Reich Ministry of Labor and its implementation of National Socialist work doctrine. In detailed and illuminating chapters, contributors scrutinize political maneuvering, ministerial operations, relations between party and administration, and individual officials' actions to reveal the surprising extent to which administrative apparatuses were involved in the Nazi regime and its crimes.
