

HOW TO APPLY MAKE UP GUIDE

Wearing makeup is common place in today's society, worn for anything from a day at work to a formal night out. However, if you're a newcomer to the world of cosmetics, you may find yourself at a loss with the infinite varieties of makeup and styles that can be found. Luckily, it's not too difficult to learn what the most elementary makeup products are, and how to use each one.

PREPARING YOUR FACE

Remove any old makeup. When you're applying makeup, it is necessary to start with a clean palette. Therefore, remove any of last night's makeup that you might have slept on, or wash off makeup from earlier on in the day. If you try to apply more makeup over the top of old makeup (not including touch ups), your end look will look caked on and more unnatural than makeup put on a fresh face. You can use a good makeup remover or a mild baby oil to get rid of all makeup residues.

- Keep in mind that you should always remove your makeup at the end of the day; sleeping with your makeup on can clog your pores and cause blemishes and wrinkles.
