*How Economics Professors Can Stop Failing Us* Steven Payson,2017-08-18 This book provides an eye opening expos on economics professors that will surely shock anyone who is not familiar with the topic and even some of those who are familiar with it It is critical of the behavior of economics professors but is not critical of the field of economics itself In fact the book argues that it is essential for economics professors to improve in the work they perform precisely because of the vital importance of their field Other books that criticize economics professors typically present complex arguments that interest only the most advanced scholars However this book is completely different It is written to be understandable to anyone who has with an interest in economics regardless of their background At the same time the book does include the most relevant scholarly arguments it just presents them in a manner that allows anyone to understand them Also unlike other books on economics *How Economics Professors Can Stop Failing Us* is written in the context of a genuine expos As such itventures backstage behind the show business that has dominated the profession revealing the profession s deep dark and at times rather ugly secrets The book is able to do this by having an author who has experienced first hand studied and written on this topic area for over three decades who has organized training seminars on it and who has served for over a decade as the Executive Director of the Association for Integrity and Responsible Leadership in Economics While exposing the profession s shameful problems the book also offers great hope in providing realistic solutions to them One of the main solutions it proposes is for economics professors who are now failing us to follow and learn from

those other professors who are not failing us who have instead admirably upheld the principles of professional ethics and scientific integrity In this sense *How Economics Professors Can Stop Failing Us* offers the most hope and perhaps the only hope for economics professors to improve and to play the responsible role that their students their employers and society overall expects of them      **Writing for Impact: How to Craft Powerful Scientific Articles** Balasubramanian
