Adolescence Michael L. Jaffe, 1998 Young people are educable Young people are worth educating Upon their wise handling depend the issues of ultimate harmony or conflict in the home in workshop or factory and among thenations Many current methods of treatment find however their justification only in the somewhat mythical descriptions of past centuries For most of these there is little support in the more careful studies of recent years

Engineering Secure Software and Systems Fabio MASSACCI, Dan Wallach, Nicola Zannone, 2010-01-25 It is our pleasure to welcome you to the proceedings of the Second International Symposium on Engineering Secure Software and Systems This unique event aimed at bringing together researchers from software engineering and security engineering which might help to unite and further develop the two communities in this and future editions The parallel technical sponsorships from the ACM SIGSAC the ACM interest group in security and ACM SIGSOFT the ACM interest group in software engineering is a clear sign of the importance of this interdisciplinary research area and its potential The difficulty of building secure

software systems is no longer focused on mastering security technology such as cryptography or access control models. Other important factors include the complexity of modern networked software systems, the unpredictability of practical development life cycles, the intertwining of and trade-off between functionality, security, and other qualities, the difficulty of dealing with human factors, and so forth. Over the last years, an entire research domain has been building up around these problems. The conference program included two major keynotes from Any Gordon, Microsoft Research, Cambridge, on the practical verification of security protocols implementation, and Angela Sasse, University College London, on security usability and an interesting blend of research, industry, and idea papers.

Caring for the Vulnerable, Mary De Chesnay, 2005. This text explores vulnerability from the perspective of individuals, groups, communities, and populations and addresses the implications of that vulnerability for nurses, nursing, and nursing care. Organized into six units, the text presents a basic structure for caring for the vulnerable and forms a theoretical perspective on caring within a cultural context with the ultimate goal of providing culturally competent care. Written specifically for nurses by nurses, *Caring for the Vulnerable* is a timely and necessary response to the culturally diverse vulnerable populations for whom nurses must provide appropriate and precise care.
