Full marks : 100

Time : 3 hours

[Answer all the questions. Figures in the margin indicate full marks.]

Part-I

1. Read the passage and answer the questions A and B.

Tertiary education in Bangladesh comprises two categories of institutions: degree awarding universities and colleges affiliated with the National University (NU). There were only 4 universities in Bangladesh at the time of independence in 1971. All of those universities were publicly financed autonomous entities. At present, there are 35 such universities. Private universities are a relatively new phenomenon in this country. In the early 1990s, the private sector came forward to establish universities. Since then the country has experienced a spectacular growth in private universities—mostly in and around Dhaka and couple of other large cities. At present, there are 79 private universities. The number of colleges providing tertiary level education is around 1,400. Most of them offer BA (pass) education of three-year duration; only one-third of them offer B.A. (Honors) courses and some offer MA degrees as well. All of these colleges are affiliated with the National University.

Accessibility to higher education implies that students get the opportunity to get university education and sufficient support from educational institutions. Increasing enrolment at the secondary and higher secondary level puts pressure on higher educational institutions. But due to limited capacity, only a small number of students may be enrolled in universities. Thus, each year a large number of students are denied access to higher education. Also, due to poverty and increase in educational expenses, students of the lower middle class do not get easy access to higher education. Moreover, those who get places in the universities have limited access to avail all kinds of diversified educational facilities relating to their study fields.

Unsafe levels of pesticides are present in around half of the vegetables and more than a quarter of fruits sold in the capital's markets, a recent survey has found. A 15-member team of the National Food Safety Laboratory, with support from the Food and Agriculture Organisation (FAO), came up with the findings after collecting and testing food samples from the capital's Gulshan, Karwanbazar and Mohakhali markets.

The survey report, a copy of which was acquired by the Dhaka Tribune, read that nearly 40% of 82 samples of milk, milk products, fish, fruits and vegetables contained banned pesticides such as DDT, Aldrin, Chlordane and Heptachlor. The amounts of pesticide in these samples were found to be 3 to 20 times greater than the limits set by the European Union. Around 50% vegetables and 35% fruits were found to be contaminated with unsafe level of pesticides.
